HELENA, MT 59620-2601

2005 Electric Annual Report

Instructions

General

- 1. A Microsoft EXCEL[©] workbook of the annual report is being provided on computer disk for your convenience. The workbook contains the schedules of the annual report. Each schedule is on the worksheet named that schedule. For example, Schedule 1 is on the sheet titled "Schedule 1". By entering your company name in the cell named "Company" of the first worksheet, the spreadsheet will put your company name on all the worksheets in the workbook. The same is true for inputting the year of the report in the cell named "YEAR". You can "GOTO" the proper cell by using the F5 key and selecting the name of the cell. You may also obtain these instructions and the report in both an Adobe Acrobat[©] format and as an EXCEL[©] file from our website at http://psc.mt.gov/. Please be sure you use the 2005 report form. It has been updated and slightly changed from the 2004 report.
- 2. Use of the disk is optional. The disk and the report cover shall be returned when the report is filed.
- 3. All forms must be filled out in permanent ink and be legible. Note: Even if the computer disk is used, a printed version of the report must be filed. Please submit one unbound copy of the annual report along with the regular number of annual reports that you submit. This aids in scanning the report so that it may be published on our web site. The orientation and margins are set up on each individual worksheet and should print on one page.
- 4. Indicate negative amounts (such as decreases) by enclosing the figures in parentheses ().
- 5. Where space is a consideration, information on financial schedules may be rounded to thousands of dollars. Companies submitting schedules rounded to thousands shall so indicate at the top of the schedule.
- 6. Where more space is needed or more than one schedule is needed additional schedules may be attached and shall be included directly behind the original schedule to which it pertains and be labeled accordingly (for example, Schedule 1A).
- 7. The information required with respect to any statement shall be furnished as a minimum requirement to which shall be added such further information as is necessary to make the required schedules not misleading.
- 8. All companies owned by another company shall attach a corporate structure chart of the holding company.
- 9. Schedules that have no activity during the year or are not applicable to the respondent shall be marked as not applicable and submitted with the report.

10. The following schedules shall be filled out with information on a total company basis:

Schedules 1 through 5 Schedules 6 and 7 Schedule 14 Schedule 17 and 18 Schedules 23 through 26 Schedules 33 and 34

- 11. All other schedules shall be filled out with either Montana specific data, or both total company and Montana specific data, as indicated in the schedule titles and headings.
- 12. Financial schedules shall include all amounts originating in Montana or allocated to Montana from other jurisdictions.
- 13. FERC Form-1 sheets may not be substituted in lieu of completing annual report schedule.
- 14. Common sense must be used when filling out all schedules.

Specific Instructions

Schedules 6 and 7

- 1. All transactions with affiliated companies shall be reported. The definition of affiliated companies as set out in 18 C.F.R. Part 101 shall be used.
- 2. Column (c). Respondents shall indicate in column (c) the method used to determine the price. Respondents shall indicate if a contract is in place between the Affiliate and the Utility. If a contract is in place, respondents shall indicate the year the contract was initiated, the term of the contract and the method used to determine the contract price.
- 3. Column (c). If the method used to determine the price is different than the previous year, respondents shall provide an explanation, including the reason for the change.

Schedules 8, 18, and 23

1. Include all notes to the financial statements required by the FERC or included in the financial statements issued as audited financial statements. These notes shall be included in the report directly behind the schedules and shall be labeled appropriately (Schedule 8A, etc.).

Schedule 12

1. Respondents shall disclose all payments made during the year for services where the aggregate payment to the recipient was \$5,000 or more. Utilities having jurisdictional revenue equal to or in excess of \$1,000,000 shall report aggregate payments of \$25,000 or more. Utilities having jurisdictional revenue equal to or in excess of \$10,000,000 shall report aggregate payments of \$75,000 or more. Payments must include fees, retainers, commissions, gifts, contributions, assessments, bonuses, subscriptions, allowances for expenses or any other form of payment for services or as a donation.

Schedule 14

- 1. Companies with more than one plan (for example, both a retirement plan and a deferred savings plan) shall complete a schedule for each plan.
- 2. Companies with defined benefit plans must complete the entire form using FASB 87 and 132 guidelines.
- 3. Interest rate percentages shall be listed to two decimal places.

Schedule 15

- 1. All changes in the employee benefit plans shall be explained in a narrative on lines 15 and 16. All cost containment measures implemented in the reporting year shall be explained and quantified in a narrative on lines 15 and 16. All assumptions used in quantifying cost containment results shall be disclosed.
- 2. Schedule 15 shall be filled out using FASB 106 and 132 guidelines.

Schedule 16

- 1. Include in the "other" column ALL additional forms of compensation, including, but not limited to: deferred compensation, deferred savings plan, profit sharing, supplemental or non-qualified retirement plan, employee stock ownership plan, restricted stock, stock options, stock appreciation rights, performance share awards, dividend equivalent shares, mortgage payments, use of company cars or car lease payments, tax preparation consulting, financial consulting, home security systems, company-paid physicals, subscriptions to periodicals, memberships, association or club dues, tuition reimbursement, employee discounts, and spouse travel.
- 2. The above compensation items shall be listed separately. Where more space is needed additional schedules may be attached directly behind the original schedule.

Schedule 17

1. Respondents shall provide all executive compensation information in conformance with that required by the Securities and Exchange Commission (SEC) (Regulation S-K Item 402, Executive Compensation).

- 2. Include in the "other" column ALL additional forms of compensation, including, but not limited to: deferred compensation, deferred savings plan, profit sharing, supplemental or non-qualified retirement plan, employee stock ownership plan, restricted stock, stock options, stock appreciation rights, performance share awards, dividend equivalent shares, mortgage payments, use of company cars or car lease payments, tax preparation consulting, financial consulting, home security systems, company-paid physicals, subscriptions to periodicals, memberships, association or club dues, tuition reimbursement, employee discounts, and spouse travel.
- 3. All items included in the "other" compensation column shall be listed separately. Where more space is needed additional schedules may be attached directly behind the original schedule.
- 4. In addition, respondents shall attach a copy of the executive compensation information provided to the SEC.

Schedule 24

1. Interest expense and debt issuance expense shall be included in the annual net cost column.

Schedule 26

- 1. Earnings per share and dividends per share shall be reported on a quarterly basis and entries shall be made only to the months that end the respective quarters (for example, March, June, September, and December.)
- 2. The retention and price/earnings ratios shall be calculated on a year end basis. Enter the actual year end market price in the "TOTAL Year End" row. If the computer disk is used, enter the year end market price in the "High" column.

Schedule 27

- 1. All entries to lines 9 or 16 must be detailed separately on an attached sheet.
- 2. Only companies who have specifically been authorized in a Commission Order to include cash working capital in ratebase may include cash working capital in lines 9 or 16. Cash working capital must be calculated using the methodology approved in the Commission Order. The Commission Order specifying cash working capital shall be noted on the attached sheet.
- 3. Indicate, for each adjustment on lines 28 through 46, if the amount is updated or is from the last rate case. All adjustments shall be calculated using Commission methodology.

Schedule 28

1. Information from this schedule is consolidated with information from other Utilities and reported to the National Association of Regulatory Utility Commissioners (NARUC). Your assistance in completing this schedule, even though information may be located in other areas of the annual report, expedites reporting to the NARUC and is appreciated.

Schedule 31

1. This schedule shall be completed for the year following the reporting year.

2. Respondents shall itemize projects of \$50,000 or more. Utilities having jurisdictional revenue equal to or in excess of \$1,000,000 shall itemize projects of \$100,000 or more. Utilities having jurisdictional revenue equal to or in excess of \$10,000,000 shall itemize projects of \$1,000,000 or more. All projects that are not itemized shall be reported in aggregate and labeled as Other.

Schedule 32

1. Provide a written narrative detailing the sources and amounts of electric supply at the time of the annual peak.

Schedule 34

- 1. The following categories shall be used in the Type column: Thermal, Hydro, Nuclear, Solar, Wind, GeoThermal, Qualifying Facility (QF), Independent Power Producer (IPP), Off System Purchases, or Other. Spot market purchases shall be separately identified. Entries for the Other category shall be listed as separate line items and include a description.
 - Note: For Off System Purchases, the Utility/Company whom the purchases are being made from shall be entered in the Plant Name column, the termination date of the purchased power contract shall be entered in the Location column.
- 2. Provide a written narrative of all outages exceeding one hour which occurred during the year. Explain the reason for the outage. If routine maintenance schedules are exceeded, explain the reason.

Schedule 35

- 1. In addition to a description, the year the program was initiated and the projected life of the program shall be included in the program description column.
- 2. On an attached sheet, define program "participant" and program conservation "unit" for each program. Also, provide the number of program participants and the number of units acquired or processed during this reporting year.

Schedule 35a

- 1. Contracted or committed current year expenditures include those expenditures that derive from preexisting contracts or commitments related to current year program activity but which will actually occur in a year other than the current year.
- 2. Expected average annual bill savings from weatherization should reflect average household bill savings based on the total households weatherized and the combined savings of all weatherization measures installed.

to affiliated companies to the total payroll costs for employees located in the general office complex. Cost of service allocation factors are also derived for office supplies, computer facilities and fixed and mobile radios based on usage of such supplies/facilities by * Corporate overhead allocation factors are derived from net plant investment and number of employees. A cost of service allocation factor for the general office complex is derived by the ratio of MDU Resources and Montana-Dakota Utilities payroll allocated affiliated companies.

* Corporate overhead allocation factors are derived from net plant investment and number of employees. A cost of service allocation factor for the general office complex is derived by the ratio of MDU Resources and Montana-Dakota Utilities payroll allocated to affiliated companies to the total payroll costs for employees located in the general office complex. Cost of service allocation factors are also derived for office supplies, computer facilities and fixed and mobile radios based on usage of such supplies/facilities by affiliated companies.

⁽¹⁾ Performance shares were granted in 2005 under the 1997 Executive Long-Term Incentive Plan and represent the opportunity to receive Company Common Stock at the end of the performance period based upon the Company's total shareholder return relative to a peer group of companies. The performance shares shown in column (b) are at the target level. The payout ranges from 0% for a rank less than 40 th percentile, to 10% at the 40 th percentile, 100% at the 50 th percentile and 200% at the 100 th percentile. Dividend equivalents also were granted and will be paid out in cash in an amount equal to the total dividends declared during the performance period on any shares that are actually earned by the participant. Performance shares and dividend equivalents that are not earned are forfeited. Vesting is accelerated upon a change in control.

⁽²⁾ Mr. Robinson resigned as Executive Vice President and Chief Financial Officer effective January 3, 2006 and retired effective February 17, 2006.

- (1) The amounts in the Pension Plan Table do not reflect any early retirement reductions.
- (2) For 2005, \$210,000 is the maximum amount of compensation that can be recognized for purposes of determining benefits under the pension plans.

The Table covers the amounts payable under the Company's qualified pension plans.

Pension benefits are determined by the step-rate formula that places emphasis on the highest consecutive 60 months of earnings within the final 10 years of service. Certain reductions are made for employees electing early retirement.

Benefits for single participants under the pension plans are paid as straight life amounts and benefits for married participants are paid as actuarially reduced pensions with a survivorship benefit for spouses, unless participants choose otherwise. Participants who terminate employment before age 55 may elect to receive their benefits in a lump sum.

The pension plans also permit pre-retirement survivorship benefits upon satisfaction of certain conditions.

The Internal Revenue Code places maximum limitations on benefit amounts that may be paid under the pension plans and on the amount of compensation that may be recognized when determining benefits. In 2005, the maximum annual benefits payable under the pension plans is \$170,000 and the maximum amount of compensation that can be recognized when determining benefits is \$210,000.

The pension plans cover salary shown in column (c) of the Summary Compensation Table and exclude bonuses and other forms of compensation.

As of December 31, 2005, the Named Officers were credited with the following years of service under the pension plans:

| Name | Pension Service Years |
|--------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

SCHEDULE 17A

The maximum years of service for benefits under the pension plans is 35. Benefit amounts under the pension plans are not subject to deduction for Social Security or offset amounts.

The Company also maintains a nonqualified retirement plan that provides supplemental retirement benefits (the "SISP"). As of December 31, 2005, 86 senior management personnel, including the Named Officers, participated in the SISP. Retirement benefits under the SISP consist of a monthly benefit commencing on the later of the participant's attainment of age 65, termination of employment or the date elected by the participant (the "Regular SISP Benefit"), and an excess retirement benefit payable up to age 65 if the participant is receiving retirement benefits under one of the Company's qualified pension plans and those benefits are reduced due to limitations under the Internal Revenue Code (the "Excess SISP Benefit").

The Regular SISP Benefits are determined pursuant to a schedule of benefits based on a participant's participation level. Participation levels are determined by the Company's chief executive officer. Based on participation levels as of December 31, 2005, Messrs. White, Hildestad, Robinson, Castleberry and Imsdahl would be entitled to the following annual Regular SISP Benefits: \$512,520, \$193,320, \$193,320, and \$125,700, respectively. Regular SISP Benefits are payable in monthly installments over a 15 year period or in an actuarial equivalent form elected by the participant.

Participants can elect to receive death benefits rather than Regular SISP Benefits or to receive part of their benefits as retirement benefits and part as death benefits. Based on participation levels as of December 31, 2005, the designated beneficiaries of Messrs. White, Hildestad, Robinson, Castleberry and Imsdahl would be entitled to the following annual death benefits over a 15 year period if the Named Officers elected not to receive any Regular SISP Benefits: \$1,025,040, \$386,640, \$386,640, and \$251,400, respectively.

Excess SISP Benefits are equal to the difference between (1) the monthly retirement benefits that would have been payable to the participant under the Company's qualified pension plans absent the limitations under the Internal Revenue Code and (2) the actual benefits payable to the participant under the qualified pension plans. The Excess SISP Benefits are only payable if the participant commences receipt of benefits under the Company's qualified pension plans prior to age 65. If payable, benefits commence when benefits under the Company's qualified pension plans commence and continue up to age 65 or the death of the participant, if prior to age 65, and, if applicable, in reduced amount until the death of the participant's spouse or joint annuitant, as applicable. If the employment of a participant whose pension plan benefits are limited under the Internal Revenue Code (therefore entitling the participant to an Excess SISP Benefit) is severed before the participant reaches the age of 55, and the participant chooses to receive his or her pension plan benefit in the form of a lump-sum payment, the participant will receive the Excess SISP Benefit in the form of a lump-sum payment. Because of the age 55 limitation, Mr. Castleberry is the only Named Officer who could receive his Excess SISP Benefit in the form of a lump-sum payment. Based on compensation levels reflected in the Summary Compensation Table and Internal Revenue Code limitations applicable in 2005, if the Named Officers had retired on December 31, 2005, Messrs. White, Hildestad, Robinson, Castleberry and Imsdahl would have been entitled to the following annual Excess SISP Benefits under the qualified pension plans in the form of a straight life annuity. The Named Officers' current ages are 64, 56, 55, 51, and 57, respectively. None of the Named Officers are currently receiving benefits under the Company's qualified pension plans.

Each of the Named Officers is fully vested in his Regular SISP Benefit and Excess SISP Benefit. Benefits under the SISP are not reduced for Social Security or other offset amounts.

CHANGE-OF-CONTROL AND SEVERANCE ARRANGEMENTS

The Company entered into Change of Control Employment Agreements with the Named Officers and other executives ("executives") in November 1998, May 2004, and February 2006, which provide certain protections to the executives in the event there is a change of control of the Company.

If a change of control occurs, the agreements provide for a three-year employment period from the date of the change of control, during which the executive is entitled to receive a base salary not less than the highest amount paid within the preceding twelve months, and annual bonuses not less than the highest bonus paid within the three years before the change of control, and to participate in the Company's incentive, savings, retirement and welfare benefit plans.

The agreements also provide that specified severance payments and benefits would be provided if the executive's employment is terminated during the employment period (or if connected to the change of control, prior thereto) by the Company, other than for cause or disability, or by the executive for good reason, which includes for any reason during the 30-day period beginning on the first anniversary of the change of control.

In such event, the executive would receive an amount equal to three times his annual base pay plus three times his highest annual bonus (as defined). In addition, he would receive (i) an immediate pro-rated cash-out of his bonus for the year of termination based on the highest annual bonus and (ii) an amount equal to the excess of (a) the actuarial equivalent of the benefit under Company qualified and nonqualified retirement plans that he would receive if he continued employment with the Company for an additional three years over (b) the actual benefit paid or payable under these plans.

The executive and family would continue to be covered by the Company's welfare benefit plans for three years. The executive also would receive outplacement benefits. Finally, the executive would receive an additional payment if necessary to make him or her whole for any federal excise tax on excess parachute payments imposed upon the executive, unless the total parachute payments were not more than 110% of the safe harbor amount for that tax (in which event the executive's payments would be reduced to the safe harbor amount).

For these purposes, "cause" generally means the executive's willful and continued failure to substantially perform his duties or willfully engaging in illegal conduct or misconduct materially injurious to the Company. "Good reason" generally includes the diminution of the executive's position, authority, duties or responsibilities, the reduction of the executive's pay or benefits, and relocation or increased travel obligations.

Subject to certain exceptions described in the agreements, a "change of control" is defined in general as (i) the acquisition by an individual, entity, or group of 20% or more of the Company's voting securities; (ii) a turnover in a majority of the Board of Directors without the approval of a majority of the members of the Board who were members of the Board as of the agreement date or whose election was approved by such Board members; (iii) a merger or similar transaction; or (iv) the stockholders' approval of the Company's liquidation or dissolution.

The Company entered into an agreement with Warren L. Robinson on November 23, 2005 in connection with his retirement as Executive Vice President and Chief Financial Officer of the Company effective January 3, 2006. Mr. Robinson agreed to continue as a special projects advisor for the Company through February 17, 2006. Mr. Robinson received a severance payment of \$1,000,000. Mr. Robinson holds annual and long-term incentive awards which have been or will be paid out based upon Company performance in accordance with the terms of the awards. Other benefits to which Mr. Robinson is entitled are determined in accordance with the terms and provisions of the Company's plans and programs.

Effective March 4, 2006, John K. Castleberry became Executive Vice President—Administration of the Company. His agreement provides for (i) a base salary of \$300,000; (ii) a one-time performance bonus of up to \$250,000; (iii) 2006 EICP awards with a target award of 50% of base salary (prorated with two months at his salary as CEO of WBI Holdings, Inc. and ten months at his salary as Executive Vice President—Administration at the Company); (iv) 6,499 performance shares under the LTIP, with a target award of 75% of base salary; (v) a supplemental lump sum pension payment to cover any pension shortfall upon his retirement; (vi) a supplemental payment to cover any SISP shortfall upon his retirement; and (vii) participation at a level 67 SISP category, which results in an annual survivor's benefit of \$468,600 for 15 years or an annual retirement benefit of \$234,300 for 15 years.

COMPENSATION COMMITTEE REPORT ON EXECUTIVE COMPENSATION

Purpose

The Compensation Committee of the Board of Directors has direct responsibility for determining compensation of the Company's executive officers and for producing an annual report on executive compensation for inclusion in the Company's proxy statement. Composed entirely of independent Directors, the Committee meets at least quarterly to review and determine compensation for the executive officers, including the Chief Executive Officer.

Executive Compensation Philosophy

The Committee believes that appropriate compensation levels succeed in both attracting and motivating high quality employees. To implement this philosophy, the Committee analyzes trends in compensation among comparable companies participating in the oil and gas industry, segments of the energy and mining industries, the peer group of companies used in the graph following this report, and similar companies from general industry. The Committee uses outside consultants for surveys and other information as it deems appropriate. The Committee then sets compensation levels that it believes are competitive within the industry and structured in a manner that rewards successful job performance. The Committee looks at compensation packages as a whole in determining target levels of compensation including prior incentive awards. The Committee also believes that executive officers should have more of their compensation at risk than other employees. There are three components of total executive compensation: base salary, annual incentive compensation, and long-term incentive compensation.

The following discussion relates to the named executive officers other than Mr. White. Mr. White's compensation is discussed below in a separate section of this report.

Base Salary

In setting base salaries, the Committee does not use a particular formula. In addition to the above data, other factors the Committee uses in its analysis include the executive's current salary in comparison to the competitive industry standard as well as individual performance and experience. For the named officers, the Committee targeted salaries at the midpoint of the competitive industry standard. The raises each named officer received varied from the midpoint based upon individual performance levels and experience. Messrs. Hildestad, Robinson and Castleberry received base salary increases averaging 15.43% for 2005. Mr. Hildestad received an additional 28.4% increase in base salary in connection with his appointment as President and Chief Operating Officer of the Company effective May 1, 2005, and Mr. Robinson received an additional 14.9% increase in base salary effective June 1, 2005. Mr. Imsdahl received a salary increase effective November 2004 in connection with his appointment as President and Chief Executive Officer of Montana-Dakota Utilities Co. and Great Plains Natural Gas Co. and received no further increase in 2005.

Incentive Compensation

In keeping with the Committee's belief that compensation should be directly linked to successful performance, the Company has established both annual and long-term incentive compensation plans. In addition, the Committee has adopted a policy limiting annual incentive compensation payments above targeted incentive amounts to ensure only a portion of incremental earnings above budget are paid to executive participants.

Annual Incentive Compensation

On February 14, 2006, the Committee approved the payment of annual awards under the existing executive incentive compensation plans with respect to 2005. On February 16, 2006, the Board approved the payments. These payments are included in the Bonus column of the Summary Compensation Table.

The terms of the executive incentive compensation plans provide for annual cash incentive awards based upon achievement of annual performance measures with a threshold, target and maximum level. A target incentive award is established based upon the position level and actual base salary, or in the Committee's discretion, the assigned salary grade market value. Actual payment may range from zero to 200% of the target based upon achievement of corporate goals and individual performance. The Committee has full discretion to determine the extent to which goals have been achieved, the payment level, whether any final payment will be made and whether to adjust awards.

The performance goals for the 2005 annual incentive under the 1997 Executive Long-Term Incentive Plan, which applied to Mr. Hildestad and Mr. Robinson, were (i) budgeted earnings per share achieved (weighted 75%) and (ii) budgeted return on invested capital achieved (weighted 25%). Achievement of budgeted levels of earnings per share and return on invested capital would result in a potential award of 100% of the target amount. Achievement of less than 85% would result in no payment, while achievement of 114% would result in a payment of 200% of the target amount. Mr. Hildestad's award opportunity under this plan was targeted at 75% of his base salary as President and Chief Operating Officer, which was set at the time of his promotion, effective May 1, 2005, and Mr. Robinson's award was targeted at 50% of his base salary. The goals were met at the maximum level (\$2.29 EPS, 10.8% ROIC) and resulted in a payment of 200% of the target amount to Messrs. Hildestad and Robinson.

In addition to his incentive award under this plan (which was prorated to reflect the eight months he served as the Company's President and Chief Executive Officer during 2005), Mr. Hildestad also received an award under the Knife River Corporation Executive Incentive Compensation Plan (prorated to reflect the four months he served as President and Chief Executive Officer of Knife River Corporation during 2005). The performance goals for 2005 under the Knife River Corporation Executive Incentive Compensation Plan were based upon (i) actual earnings per allocated share as a percentage of planned earnings per allocated share (weighted 75%) and (ii) return on invested capital as a percentage of planned return on invested capital (weighted 25%). Achievement of budgeted levels of earnings per allocated share and return on invested capital would result in a potential award of 100% of the target amount. Achievement of less than 80% would result in no payment, while achievement of 120% would result in a payment of 200% of the target amount. The target amounts were \$1.31 EPS and 7.10% ROIC. Mr. Hildestad's award under the Knife River Corporation Executive Incentive Compensation Plan was earned at less than target on a weighted basis and resulted in a payment of 67% of the target amount.

In addition to his original incentive opportunity discussed above, Mr. Robinson received an incentive award for a June 1, 2005 through December 31, 2005 performance period. The award was subject to the achievement of the same weighted performance goals, and carried the same potential percentage payouts, as described above. This award opportunity was targeted at 47.48% of Mr. Robinson's base salary during the performance period, prorated to reflect the seven month performance period. The goals were met at the maximum level and resulted in a payment of 200% of the target amount.

Mr. Castleberry received his award pursuant to the WBI Holdings, Inc. Executive Incentive Compensation Plan, based upon (i) actual earnings per

allocated share as a percentage of targeted earnings per allocated share (weighted 75%) and (ii) actual return on invested capital as a percentage of targeted return on invested capital (weighted 25%) for WBI Holdings, Inc. The target amounts were \$3.09 EPS, 13.5% ROIC. Mr. Castleberry's award was targeted at 50% of his base salary and was earned at 200% of target on a weighted basis and resulted in a potential payment of 200% of the target amount. Mr. Castleberry's actual award payment pursuant to the above guidelines was equal to 95% of the potential payment amount. Payment of an additional 5% of the potential amount was contingent on the achievement of Company-wide safety-related goals. The safety related goals were partially met and Mr. Castleberry received an additional 2.5% of the potential payment amount.

Mr. Imsdahl received his award pursuant to the Montana-Dakota Utilities Co. Executive Incentive Compensation Plan, based upon (i) actual earnings per allocated share as a percentage of targeted earnings per allocated share (weighted 75%) and (ii) actual return on invested capital as a percentage of targeted return on invested capital (weighted 25%) for Montana-Dakota Utilities Co. and Great Plains Natural Gas Co. The target amounts were \$0.61 EPS, 6.268% ROIC. Mr. Imsdahl's award was targeted at 50% of his base salary and was earned near the maximum level on a weighted basis and resulted in a payment of 197% of the target amount.

Long-Term Incentive Compensation

Long-term incentive compensation serves to encourage successful strategic management and is awarded under the 1997 Executive Long-Term Incentive Plan.

Based upon a study of the Company's executive compensation programs in 2002, the Committee made several changes to its approach to the long-term incentive compensation, including the elimination of stock options and restricted stock grants effective in 2003. The Committee does not expect to make additional stock option or restricted stock grants under the 1997 Executive Long-Term Incentive Plan. Beginning with grants made in 2003, the Committee is using performance shares, with dividend equivalents, as the form of long-term incentive compensation. Performance shares represent the opportunity to receive Company Common Stock at the end of the performance period based upon the Company's total shareholder return ("TSR") relative to the same peer group of companies used in the Performance Graph. Dividend equivalents represent the opportunity to receive cash in an amount equal to the total dividends declared during the performance period on any shares that are actually earned. These awards are expected to be made annually. This long-term award is designed to ensure the retention value and the motivation effect of the Company's long-term compensation program on the Company's executive officers.

Awards for the 2005-2007 performance period were made to the named officers in 2005. The level of award for each executive officer was determined by using the Committee approved target incentive guidelines. The performance share awards were targeted at 75% to 90% of base salary. The payouts will range from 0% for a TSR rank less than the 40 th percentile, to 10% at the 40 th percentile, 100% at the 50 th percentile and 200% at the 100 th percentile.

Awards for the 2003-2005 performance period were granted to executive officers in 2003. These awards were earned at the 118% level, which reflects TSR performance at the 59 th percentile. As a result, the named executive officers received a payment of Company Common Stock and cash equal to the dividend equivalents. These amounts are disclosed in the LTIP Payout column in the Summary Compensation Table.

The Committee granted shares of restricted stock to the executive officers in 2000. Vesting of 54% of these shares was accelerated after the first performance cycle (2000-2002) based upon achievement of TSR goals at the 54 th percentile. TSR in comparison to the proxy peer group for the second performance cycle (2003-2005) resulted in acceleration of vesting of the remaining shares. The named executive officers received shares as follows: Mr. Hildestad-3,450 shares; Mr. Robinson-2,760 shares; Mr. Castleberry-2,760 shares; and Mr. Imsdahl-2,070 shares.

CEO Compensation

The Committee reviewed the total amount of Mr. White's compensation and believes that it is reasonable. His 2005 compensation was comprised of base salary, annual incentive and long-term incentive. During 2005, only approximately 23.7% of Mr. White's compensation was base pay, with the remainder being performance-based. This reflects the Committee's belief in the importance of having substantial at risk compensation to provide a direct and strong link between performance and executive pay.

Mr. White received a 7.7% increase in base salary for 2005, from \$650,000 to \$700,000.

Mr. White's annual incentive award opportunity was based on (i) budgeted earnings per share achieved (weighted 75%) and (ii) budgeted return on invested capital (weighted 25%). Achievement of the goals at less than 85% would result in no payment, while achievement of 100% would result in a payment of 100% of the target amount and achievement of 114% would result in a payment of 200% of the target amount. Mr. White's award was targeted at 100% of his base salary for 2005 based on executive salary structure and target incentive guidelines approved by the Committee. The goals were met at the maximum level (\$2.29 EPS, 10.8% ROIC) and resulted in a payment of 200% of the target amount. This amount is disclosed in the Bonus column in the Summary Compensation Table.

Mr. White received an award of performance shares for the 2005-2007 performance period. His target award was at 133% of his base salary. As discussed above, performance shares represent the opportunity to receive Company Common Stock at the end of the performance period based upon the Company's total shareholder return relative to the proxy group of companies. The payout ranges from 0% for a rank less than the 40 th percentile, to 10% at the 40 th percentile, 100% at the 50 th percentile and 200% at the 100 th percentile. Dividend equivalents were also granted and will be paid out in cash in an amount equal to the total dividends declared during the performance period on any shares that are actually earned.

Awards for the 2003-2005 performance period were granted to Mr. White in 2003 and were earned at the 118% level, reflecting TSR performance at the 59 th percentile. As a result, Mr. White received a payment of Company Common Stock and cash equal to the dividend equivalents. These amounts are disclosed in the LTIP Payout column in the Summary Compensation Table.

Mr. White also received 6,900 shares of Company Common Stock when vesting of the remaining restricted stock awards granted in 2000 was accelerated based on TSR achieved at the 54 th percentile for the second performance cycle (2003-2005).

Repayment of Incentive Compensation

The Committee adopted incentive repayment guidelines at its February 2005 meeting that allow the Committee to secure repayment from, or to make additional payments to, senior officers if Company accounting restatements occur within three years after incentive payments have been made. The Committee may rescind award vesting, rescind vesting acceleration, require award forfeiture or require cash repayment.

Stock Ownership Guidelines

In 1993, the Board of Directors adopted Stock Ownership Guidelines under which executives are required to own Company Common Stock valued from one to four times their annual salary. In 2005, the Board adopted Stock Ownership Guidelines for non-employee directors of five times their annual cash retainer.

Section 162(m)

The Committee monitors the impact of federal tax laws on executive compensation, including Section 162(m) of the Internal Revenue Code. The deductibility of some types of compensation depends upon the timing of an executive's vesting or exercise of awards or on whether such awards qualify as "performance-based" under the provisions of Section 162(m). The Committee will consider the possible tax effect when structuring performance based compensation but may pay compensation to its executive officers that is not fully deductible.

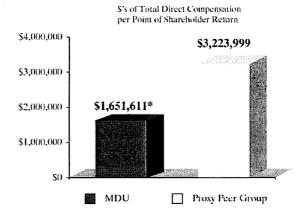

2005 Executive Compensation Analysis

In 2004 the Compensation Committee requested an analysis by the Company's human resources department of the value of the Company's executive compensation program. Specifically, the Committee sought to determine whether or not the relationship between the level of compensation and shareholder return was more favorable than that of the proxy peer group. In 2005 the Compensation Committee requested an update of the analysis.

The 2005 analysis consisted of comparing what the Company paid its named executive officers for the years 2000 through 2004 to the Company's average annual total shareholder return over the same five-year period. The Company's pay ratio was compared to the ratios of companies in the proxy peer group. (1)

All data used in the analysis, including the valuation of long-term incentives and calculation of shareholder return, were provided by Equilar, Inc.

5 Year Total Direct Compensation to 5 Year Shareholder Return

^{*} A smaller number indicates greater value to shareholders.

The results of the analysis showed that the Company paid its named executive officers significantly less than what the peer group companies paid their named executive officers for comparable levels of shareholder return over the five-year period (see the above graph). Specifically, the Company paid its named executives approximately \$1.6 million less per point of shareholder return than the proxy peer group. The Committee views these results as confirmation that MDU Resources Group, Inc.'s stockholders receive high value for the compensation paid to Company executives. Additionally, the results improved when compared to the results contained in last year's proxy statement.

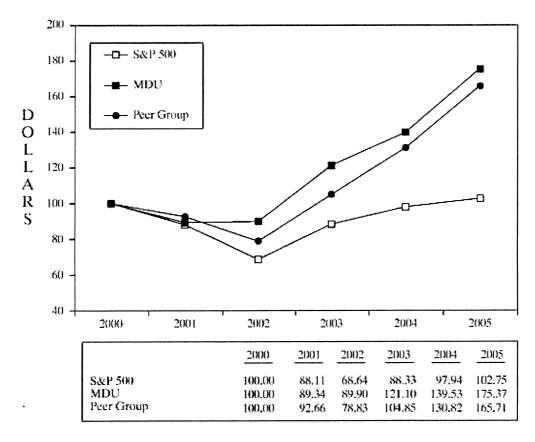

Harry J. Pearce, Chairman Thomas Everist, Member Karen B. Fagg, Member Dennis W. Johnson, Member Richard H. Lewis, Member Patricia L. Moss, Member

⁽¹⁾ Vectren Corporation was not included because full five-year data was not available. Vectren Corporation was formed in 2000 by a merger of Indiana Energy, Inc. and SIGCORP.

For purposes of this analysis, compensation data on Hanson PLC ADR executives were converted from British pounds to U.S. dollars. The rate of conversion was the average exchange rate for a given year, as reported by the currency site www.OANDA.com.

MDU RESOURCES GROUP, INC. COMPARISON OF FIVE YEAR TOTAL STOCKHOLDER RETURN (1)

Total Stockholder Return Index (2000=100)

(1) All data is indexed to December 31, 2000, for the Company, the S&P 500, and the Peer Group. Total stockholder return is calculated using the December 31 price for each year. It is assumed that all dividends are reinvested in stock at the frequency paid, and the returns of each component peer issuer of the group is weighted according to the issuer's stock market capitalization at the beginning of the period.

Peer Group issuers are Allegheny Energy, Inc., Allete, Inc., Alliant Energy Corporation, Black Hills Corporation, Comstock Resources, Inc., Equitable Resources, Inc., Florida Rock Industries, Inc., Hanson PLC ADR, KeySpan Corporation, Kinder Morgan, Inc., Martin Marietta Materials, Inc., Newfield Exploration Company, NICOR, Inc., OGE Energy Corp., ONEOK, Inc., Peoples Energy Corporation, Pogo Producing Company, Quanta Services, Inc., Questar Corporation, SCANA Corporation, Stone Energy Corporation, TECO Energy, Inc., UGI Corporation, Vectren Corporation (formerly Indiana Energy, Inc.), Vulcan Materials Company, and XTO Energy, Inc. (formerly Cross Timbers Oil Company).

| NOTES TO FINANCIAL STATEMENTS (Continued) | | | | | | | |

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

NOTE 1 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Basis of presentation

The consolidated financial statements of the Company include the accounts of the following businesses: electric, natural gas distribution, construction services, pipeline and energy services, natural gas and oil production, construction materials and mining, independent power production, and other. The electric, natural gas distribution, and pipeline and energy services businesses are substantially all regulated. Construction services, natural gas and oil production, construction materials and mining, independent power production, and other are nonregulated. For further descriptions of the Company's businesses, see Note 13. The statements also include the ownership interests in the assets, liabilities and expenses of two jointly owned electric generating facilities.

The Company uses the equity method of accounting for certain investments. For more information on the Company's equity method investments, see Note 2.

The Company's regulated businesses are subject to various state and federal agency regulations. The accounting policies followed by these businesses are generally subject to the Uniform System of Accounts of the FERC. These accounting policies differ in some respects from those used by the Company's nonregulated businesses.

The Company's regulated businesses account for certain income and expense items under the provisions of SFAS No. 71. SFAS No. 71 requires these businesses to defer as regulatory assets or liabilities certain items that would have otherwise been reflected as expense or income, respectively, based on the expected regulatory treatment in future rates. The expected recovery or flowback of these deferred items generally is based on specific ratemaking decisions or precedent for each item. Regulatory assets and liabilities are being amortized consistently with the regulatory treatment established by the FERC and the applicable state public service commissions. See Note 4 for more information regarding the nature and amounts of these regulatory deferrals.

Cash and cash equivalents

The Company considers all highly liquid investments purchased with an original maturity of three months or less to be cash equivalents.

Allowance for doubtful accounts

The Company's allowance for doubtful accounts as of December 31, 2005 and 2004, was \$8.0 million and \$6.8 million, respectively.

Natural gas in underground storage

Natural gas in underground storage for the Company's regulated operations is carried at cost using the last-in, first-out method. The portion of the cost of natural gas in underground storage expected to be used within one year was included in inventories and was \$24.7 million and \$24.9 million at December 31, 2005 and 2004, respectively. The remainder of natural gas in underground storage was included in other assets and was \$43.2 million and \$43.3 million at December 31, 2005 and 2004, respectively.

Inventories

Inventories, other than natural gas in underground storage for the Company's regulated operations, consisted primarily of aggregates held for resale of \$78.1 million and \$71.0 million, materials and supplies of \$48.7 million and \$31.0 million, and other inventories of \$20.7 million and \$17.0 million, as of December 31, 2005 and 2004, respectively. These inventories were stated at the lower of cost or market.

Property, plant and equipment

Additions to property, plant and equipment are recorded at cost when first placed in service. When regulated assets are retired, or otherwise disposed of in the ordinary course of business, the original cost of the asset is charged to accumulated depreciation. With respect to the retirement or disposal of all other assets, except for natural gas and

| | NOTES TO FINANCIAL STATEMENTS (Continued |) | |

oil production properties as described in natural gas and oil properties in this note, the resulting gains or losses are recognized as a component of income. The Company is permitted to capitalize AFUDC on regulated construction projects and to include such amounts in rate base when the related facilities are placed in service. In addition, the Company capitalizes interest, when applicable, on certain construction projects associated with its other operations. The amount of AFUDC and interest capitalized was \$11.5 million, \$6.2 million and \$7.4 million in 2005, 2004 and 2003, respectively. Generally, property, plant and equipment are depreciated on a straight-line basis over the average useful lives of the assets, except for depletable reserves, which are depleted based on the units-of-production method based on recoverable aggregate reserves, and natural gas and oil production properties, which are amortized on the units-of-production method based on total reserves.

Property, plant and equipment at December 31, 2005 and 2004, was as follows:

| | | | Depreciable |

| | NOTES TO FINANCIAL STATEMENTS (Continued |) | |

- * Amortized on the units-of-production method based on total proved reserves at an Mcf equivalent average rate of \$1.19, \$.98 and \$.89 for the years ended December 31, 2005, 2004 and 2003, respectively. Includes natural gas and oil production properties accounted for under the full-cost method, of which \$82.3 million and \$69.0 million were excluded from amortization at December 31, 2005 and 2004, respectively.
- ** Depleted on the units-of-production method based on recoverable aggregate reserves.

Impairment of long-lived assets

The Company reviews the carrying values of its long-lived assets, excluding goodwill and natural gas and oil properties, whenever events or changes in circumstances indicate that such carrying values may not be recoverable. The determination of whether an impairment has occurred is based on an estimate of undiscounted future cash flows attributable to the assets, compared to the carrying value of the assets. If impairment has occurred, the amount of the impairment recognized is determined by estimating the fair value of the assets and recording a loss if the carrying value is greater than the fair value. In the third quarter of 2004, the Company recognized a \$2.1 million (\$1.3 million after tax) adjustment reflecting the reduction in value of certain gathering facilities in the Gulf Coast region at the pipeline and energy services segment. No impairment losses were recorded in 2005 and 2003. Unforeseen events and changes in circumstances could require the recognition of other impairment losses at some future date.

Goodwill

Goodwill represents the excess of the purchase price over the fair value of identifiable net tangible and intangible assets acquired in a business combination. Goodwill is required to be tested for impairment annually, or more frequently if events or changes in circumstances indicate that goodwill may be impaired. In the third quarter of 2004, the Company recognized a goodwill impairment at the pipeline and energy services segment. No goodwill impairment losses were recorded in 2005 and 2003. For more information on the goodwill impairment and goodwill, see Note 3.

Natural gas and oil properties

The Company uses the full-cost method of accounting for its natural gas and oil production activities. Under this method, all costs incurred in the acquisition, exploration and development of natural gas and oil properties are capitalized and amortized on the units-of-production method based on total proved reserves. Any conveyances of properties, including gains or losses on abandonments of properties, are treated as adjustments to the cost of the properties with no gain or loss recognized. Capitalized costs are subject to a "ceiling test" that limits such costs to the aggregate of the present value of future net revenues of proved reserves based on single point-in-time spot market prices, as mandated under the rules of the SEC, plus the cost of unproved properties. Future net revenue is estimated based on end-of-quarter spot market prices adjusted for contracted price changes. If capitalized costs exceed the full-cost ceiling at the end of any quarter, a permanent noncash write-down is required to be charged to earnings in that quarter unless subsequent price changes eliminate or reduce an indicated write-down.

At December 31, 2005 and 2004, the Company's full-cost ceiling exceeded the Company's capitalized cost. However, sustained downward movements in natural gas and oil prices subsequent to December 31, 2005, could result in a future write-down of the Company's natural gas and oil properties.

The following table summarizes the Company's natural gas and oil properties not subject to amortization at December 31, 2005, in total and by the year in which such costs were incurred:

| Name of Respondent | This Report is: | Date of Report | Year/Period of Report |
|---------------------------|------------------------------------------|----------------|-----------------------|
| | (1) <u>X</u> An Original | (Mo, Da, Yr) | · |
| MDU Resources Group, Inc. | (2) _ A Resubmission | 12/31/2005 | 2005/Q4 |
| | NOTES TO FINANCIAL STATEMENTS (Continued |) | |

| | _ | | Year Costs | Incurred | |
|-------------------------|----------|----------|-------------|----------|-------------------|
| | Total | 2005 | 2004 | 2003 | 2002 and prior |
| | | (I | n thousands |) | |
| Acquisition | \$38,971 | \$13,723 | \$3,180 | \$ 481 | \$21,587 |
| Development | 25,586 | 15,805 | 7,567 | 450 | 1,764 |
| Exploration | 10,124 | 9,899 | 225 | | · |
| Capitalized interest | 7,610 | 2,556 | 2,039 | 687 | 2,328 |
| Total costs not subject | | | | | |
| to amortization | \$82,291 | \$41,983 | \$13,011 | \$1,618 | \$25,679 |

Costs not subject to amortization as of December 31, 2005, consisted primarily of unevaluated leaseholds, drilling costs and seismic costs; and capitalized interest associated primarily with coalbed development in the Powder River Basin of Montana and Wyoming, an exploration project in southern Texas, an enhanced recovery development project in the Cedar Creek Anticline in southeastern Montana, the Bakken Play in western North Dakota, and a Red River B prospect in western South Dakota. The Company expects that the majority of these costs will be evaluated within the next five years and included in the amortization base as the properties are developed and evaluated and proved reserves are established or impairment is determined.

Revenue recognition

Revenue is recognized when the earnings process is complete, as evidenced by an agreement between the customer and the Company, when delivery has occurred or services have been rendered, when the fee is fixed or determinable and when collection is probable. The Company recognizes utility revenue each month based on the services provided to all utility customers during the month. The Company recognizes construction contract revenue at its construction businesses using the percentage-of-completion method as discussed later. The Company recognizes revenue from natural gas and oil production properties only on that portion of production sold and allocable to the Company's ownership interest in the related well. Revenues at the independent power production operations are recognized based on electricity delivered and capacity provided, pursuant to contractual commitments and, where applicable, revenues are recognized under EITF No. 91-6 ratably over the terms of the related contract. The Company recognizes all other revenues when services are rendered or goods are delivered.

Percentage-of-completion method

The Company recognizes construction contract revenue from fixed-price and modified fixed-price construction contracts at its construction businesses using the percentage-of-completion method, measured by the percentage of costs incurred to date to estimated total costs for each contract. If a loss is anticipated on a contract, the loss is immediately recognized. Costs in excess of billings on uncompleted contracts of \$52.3 million and \$31.9 million at December 31, 2005 and 2004, respectively, represent revenues recognized in excess of amounts billed and were included in receivables, net. Billings in excess of costs on uncompleted contracts of \$50.7 million and \$32.2 million at December 31, 2005 and 2004, respectively, represent billings in excess of revenues recognized and were included in accounts payable. Also included in receivables, net, were amounts representing balances billed but not paid by customers under retainage provisions in contracts that amounted to \$59.5 million and \$40.9 million at December 31, 2005 and 2004, respectively, which are expected to be paid within one year or less.

Derivative instruments

The Company's policy allows the use of derivative instruments as part of an overall energy price, foreign currency and interest rate risk management program to efficiently manage and minimize commodity price, foreign currency and interest rate risk. The Company's policy prohibits the use of derivative instruments for speculating to take advantage of market trends and conditions, and the Company has procedures in place to monitor compliance with its policies. The Company is exposed to credit-related losses in relation

|--|---|----|---|---|----|----|---|----|-----|-----|--------|
|--|---|----|---|---|----|----|---|----|-----|-----|--------|

| Name of Respondent | This Report is: | Date of Report | Year/Period of Report |
|---------------------------|------------------------------------------|----------------|-----------------------|
| | (1) <u>X</u> An Original | (Mo, Da, Yr) | · |
| MDU Resources Group, Inc. | (2) _ A Resubmission | 12/31/2005 | 2005/Q4 |
| | NOTES TO FINANCIAL STATEMENTS (Continued |) | |

to derivative instruments in the event of nonperformance by counterparties. The Company's policy requires that natural gas and oil price derivative instruments and interest rate derivative instruments not exceed a period of 24 months and foreign currency derivative instruments not exceed a 12-month period. The Company's policy requires settlement of natural gas and oil price derivative instruments monthly and all interest rate derivative transactions must be settled over a period that will not exceed 90 days, and any foreign currency derivative transaction settlement periods may not exceed a 12-month period. The Company has policies and procedures that management believes minimize credit-risk exposure. These policies and procedures include an evaluation of potential counterparties' credit ratings and credit exposure limitations. Accordingly, the Company does not anticipate any material effect on its financial position or results of operations as a result of nonperformance by counterparties. For more information on derivative instruments, see Note 5.

Asset retirement obligations

The Company records the fair value of a liability for an asset retirement obligation in the period in which it is incurred. When the liability is initially recorded, the Company capitalizes a cost by increasing the carrying amount of the related long-lived asset. Over time, the liability is accreted to its present value each period, and the capitalized cost is depreciated over the useful life of the related asset. Upon settlement of the liability, the Company either settles the obligation for the recorded amount or incurs a gain or loss. For more information on asset retirement obligations, see Note 8.

Natural gas costs recoverable or refundable through rate adjustments Under the terms of certain orders of the applicable state public service commissions, the Company is deferring natural gas commodity, transportation and storage costs that are greater or less than amounts presently being recovered through its existing rate schedules. Such orders generally provide that these amounts are recoverable or refundable through rate adjustments within a period ranging from 24 to 28 months from the time such costs are paid. Natural gas costs recoverable through rate adjustments amounted to \$691,000 and \$15.5 million at December 31, 2005 and 2004, respectively, which is included in prepayments and other current assets.

Insurance

Certain subsidiaries of the Company are insured for workers' compensation losses, subject to deductibles ranging up to \$750,000 per occurrence. Automobile liability and general liability losses are insured, subject to deductibles ranging up to \$500,000 per accident or occurrence. These subsidiaries have excess coverage above the primary automobile and general liability policies on a claims first-made basis beyond the deductible levels. The subsidiaries of the Company are retaining losses up to the deductible amounts accrued on the basis of estimates of liability for claims incurred and for claims incurred but not reported.

Income taxes

The Company provides deferred federal and state income taxes on all temporary differences between the book and tax basis of the Company's assets and liabilities. Excess deferred income tax balances associated with the Company's rate-regulated activities resulting from the Company's adoption of SFAS No. 109 have been recorded as a regulatory liability and are included in other liabilities. These regulatory liabilities are expected to be reflected as a reduction in future rates charged to customers in accordance with applicable regulatory procedures.

The Company uses the deferral method of accounting for investment tax credits and amortizes the credits on electric and natural gas distribution plant over various periods that conform to the ratemaking treatment prescribed by the applicable state public service commissions.

Foreign currency translation adjustment The functional currency of the Company's investment in a 220-MW natural gas-fired electric

FERC FORM NO. 1 (ED. 12-88)

Page 123.5

| Name of Respondent | This Report is: | Date of Report | Year/Period of Report |

| | NOTES TO FINANCIAL STATEMENTS (Continued |) | |

generating facility in Brazil, as further discussed in Note 2, was the Brazilian Real. Translation from the Brazilian Real to the U.S. dollar for assets and liabilities was performed using the exchange rate in effect at the balance sheet date. Revenues and expenses had been translated using the weighted average exchange rate for each month prevailing during the period reported. Adjustments resulting from such translations were reported as a separate component of other comprehensive income (loss) in common stockholders' equity.

Transaction gains and losses resulting from the effect of exchange rate changes on transactions denominated in a currency other than the functional currency of the reporting entity were recorded in income.

Common stock split

On August 14, 2003, the Company's Board of Directors approved a three-for-two common stock split. For more information on the common stock split, see Note 10.

Earnings per common share

Basic earnings per common share were computed by dividing earnings on common stock by the weighted average number of shares of common stock outstanding during the year. Diluted earnings per common share were computed by dividing earnings on common stock by the total of the weighted average number of shares of common stock outstanding during the year, plus the effect of outstanding stock options, restricted stock grants and performance share awards. For the years ended December 31, 2004 and 2003, 36,000 shares and 209,805 shares, respectively, with an average exercise price of \$25.70 and \$24.56, respectively, attributable to the exercise of outstanding options, were excluded from the calculation of diluted earnings per share because their effect was antidilutive. In 2005, there were no shares excluded from the calculation of diluted earnings per share. Common stock outstanding includes issued shares less shares held in treasury.

Stock-based compensation

The Company has stock option plans for directors, key employees and employees. In 2003, the Company adopted the fair value recognition provisions of SFAS No. 123 and began expensing the fair market value of stock options for all awards granted on or after January 1, 2003. Compensation expense recognized for awards granted on or after January 1, 2003, for the years ended December 31, 2005, 2004 and 2003, was \$2,000, \$18,000 and \$41,000 respectively (after tax).

As permitted by SFAS No. 148, the Company accounts for stock options granted prior to January 1, 2003, under APB Opinion No. 25. No compensation expense has been recognized for stock options granted prior to January 1, 2003, as the options granted had an exercise price equal to the market value of the underlying common stock on the date of the grant.

The Company adopted SFAS No. 123 effective January 1, 2003, for newly granted options only. The following table illustrates the effect on earnings and earnings per common share for the years ended December 31, 2005, 2004 and 2003, as if the Company had applied SFAS No. 123 and recognized compensation expense for all outstanding and unvested stock options based on the fair value at the date of grant:

Use of estimates

Earnings before cumulative effect

Earnings per common share - diluted

Cumulative effect of accounting change

of accounting change

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires the Company to make estimates and assumptions that affect the reported amounts of assets and liabilities, and disclosure of contingent assets and liabilities at the date of the financial statements, as well as the reported amounts of revenues and expenses during the reporting period. Estimates are used for items such as impairment testing of long-lived assets, goodwill and natural gas and oil properties; fair values of acquired assets and liabilities under the purchase method of accounting; natural gas and oil reserves; property depreciable lives; tax provisions; uncollectible accounts; environmental and other loss contingencies; accumulated provision for revenues subject to refund; costs on construction contracts; unbilled revenues; actuarially determined benefit costs; asset retirement obligations; the valuation of stock-based compensation; and the fair value of derivative instruments. As additional information becomes available, or actual amounts are determinable, the recorded estimates are revised. Consequently, operating results can be affected by revisions to prior accounting estimates.

| NOTES TO FINANCIAL STATEMENTS (Continued) | | | | | | | | |

SAB No. 106 In September 2004, the SEC issued SAB No. 106, which is an interpretation regarding the application of SFAS No. 143 by oil and gas producing companies following the full-cost accounting method. SAB No. 106 clarifies that the future cash outflows associated with settling asset retirement obligations that have been accrued on the balance sheet should be excluded from the computation of the present value of estimated future net revenues for purposes of the full-cost ceiling calculation. SAB No. 106 also states that a company is expected to disclose in the financial statement footnotes and MD&A how the company's calculation of the ceiling test and depreciation, depletion and amortization are affected by the adoption of SFAS No. 143. SAB No. 106 was effective for the Company as of January 1, 2005. The adoption of SAB No. 106 did not have a material effect on the Company's financial position or results of operations. The effects of the adoption of SFAS No. 143 and SAB No. 106 as they relate to the Company's natural gas and oil production properties are described below.

Ceiling Test Calculation

As discussed in this note, the Company's natural gas and oil production properties are subject to a "ceiling test" that limits capitalized costs to the aggregate of the present value of future net revenues of proved reserves based on single point-in-time spot market prices, as mandated under the rules of the SEC, and the cost of unproved properties. Prior to the adoption of SFAS No. 143, the Company calculated the full-cost ceiling by reducing its expected future revenues from proved natural gas and oil reserves by the estimated future expenditures to be incurred in developing and producing such reserves, including future retirements, discounted using a factor mandated by the rules of the SEC. While expected future cash flows related to the asset retirement obligations were included in the calculation of the ceiling test, no associated asset retirement obligation was recognized on the balance sheet.

Upon the adoption of SFAS No. 143 but prior to the effective date of SAB No. 106, the Company continued to calculate the full-cost ceiling as previously described. In addition, the Company recorded the fair value of a liability for the asset retirement obligation and capitalized the cost by increasing the carrying amount of the related long-lived asset.

Upon the adoption of SAB No. 106, the future capitalized discounted cash outflows associated with settling asset retirement obligations that are accrued on the consolidated balance sheet are excluded from the computation of the present value of estimated future net revenues for purposes of the full-cost ceiling calculation in accordance with SAB No. 106.

Depreciation, Depletion and Amortization Costs subject to amortization include: (A) all capitalized costs, less accumulated amortization, other than the cost of acquiring and evaluating unproved property; (B) the estimated future expenditures (based on current costs) to be incurred in developing proved reserves; and (C) estimated dismantlement and abandonment costs, net of estimated salvage values.

Subsequent to the adoption of SFAS No. 143, the estimated future dismantlement and abandonment costs described in (C) above are included in the capitalized costs described in (A) above at the expected future cost discounted to the present value, to the extent that a legal obligation exists. Under SFAS No. 143, the recognition of the asset retirement obligation does not take into account estimated salvage values. The liability associated with the recognition of an asset retirement obligation is accreted over time with accretion expense recorded in depreciation, depletion and amortization expense on the Consolidated Statements of Income. The Company's estimated dismantlement and abandonment costs as described in (C) above were adjusted to account for asset retirement obligations accrued on the Consolidated Balance Sheets when calculating the depreciation, depletion and amortization rates. In addition, estimated salvage values were included in the Company's depreciation, depletion and amortization calculation. The Company's estimate of future dismantlement and abandonment costs that will be incurred as a result of future development activities on proved reserves continues to be included in the calculation of

| Name of Respondent | This Report is: | Date of Report | Year/Period of Report | | | | | |

| NOTES TO FINANCIAL STATEMENTS (Continued) | | | | | | | | |

costs to be amortized.

Any gains or losses on the settlement of an asset retirement obligation, if applicable, are treated as adjustments to the capitalized costs, consistent with the full-cost accounting method.

SFAS No. 123 (revised) In December 2004, the FASB issued SFAS No. 123 (revised). This accounting standard revises SFAS No. 123 and requires entities to recognize compensation expense in an amount equal to the grant-date fair value of share-based payments granted to employees. SFAS No. 123 (revised) is effective for the Company on January 1, 2006. As of the required effective date, the Company will apply SFAS No. 123 (revised) using the modified prospective method, recognizing compensation expense for all awards granted after the date of adoption of SFAS No. 123 (revised) and for the unvested portion of previously granted awards that remain outstanding at the date of adoption. The Company used the Black-Scholes option-pricing model to calculate the fair value of stock options. The Company estimates the adoption of SFAS No. 123 (revised) will result in less than \$300,000 (after tax) in additional stock-based compensation expense for the year ended December 31, 2006.

FIN 47 In March 2005, the FASB issued FIN 47. FIN 47 addresses the diverse accounting practices that developed with respect to the timing of liability recognition for legal obligations associated with the retirement of a tangible long-lived asset when the timing and/or method of settlement of the obligation are conditional on a future event. FIN 47 concludes that an entity is required to recognize a liability for the fair value of a conditional asset retirement obligation when incurred if the liability's fair value can be reasonably estimated. FIN 47 is effective for the Company at the end of the fiscal year ending December 31, 2005. The adoption of FIN 47 did not have a material effect on the Company's financial position or results of operations.

EITF No. 04-6 In March 2005, the FASB ratified EITF No. 04-6. EITF No. 04-6 requires that post-production stripping costs be treated as a variable inventory production cost. As a result, such costs will be subject to inventory costing procedures in the period they are incurred. EITF No. 04-6 is effective for the Company on January 1, 2006. The adoption of EITF No. 04-6 is not expected to have a material effect on the Company's financial position or results of operations.

Comprehensive income

Comprehensive income is the sum of net income as reported and other comprehensive income (loss). The Company's other comprehensive income (loss) resulted from gains (losses) on derivative instruments qualifying as hedges, minimum pension liability adjustments and foreign currency translation adjustments. For more information on derivative instruments, see Note 5.

The components of other comprehensive income (loss), and their related tax effects for the years ended December 31, 2005, 2004 and 2003, were as follows:

| | 2005 | 2004 | 2003 |

| Balance | at | | 31, | 2004 | \$ | | | | | |

NOTE 2 - EQUITY METHOD INVESTMENTS

The Company has a number of equity method investments including Carib Power and Hartwell. The Company assesses its equity method investments for impairment whenever events or changes in circumstances indicate that the related carrying values may not be recoverable. None of the Company's equity method investments have been impaired and, accordingly, no impairment losses have been recorded in the accompanying consolidated financial statements or related equity method investment balances.

In February 2004, Centennial International acquired 49.99 percent of Carib Power. Carib Power, through a wholly owned subsidiary, owns a 225-MW natural gas-fired electric generating facility in Trinidad and Tobago. The Trinity Generating Facility sells its output to the T&TEC, the governmental entity responsible for the transmission, distribution and administration of electrical power to the national electrical grid of Trinidad and Tobago. The power purchase agreement expires in September 2029. T&TEC also is under contract to supply natural gas to the Trinity Generating Facility during the term of the power purchase agreement. The functional currency for the Trinity Generating Facility is the U.S. dollar.

In September 2004, Centennial Resources, through indirect wholly owned subsidiaries, acquired a 50-percent ownership interest in Hartwell, which owns a 310-MW natural gas-fired electric generating facility near Hartwell, Georgia. The Hartwell Generating Facility sells its output under a power purchase agreement with Oglethorpe that expires in May 2019. Oglethorpe reimburses the Hartwell Generating Facility for actual costs of fuel required to operate the plant. American National Power, a wholly owned subsidiary of International Power of the United Kingdom, holds the remaining 50-percent ownership interest and is the operating partner for the facility.

In June 2005, the Company completed the sale of its 49 percent interest in MPX to Petrobras, the Brazilian state-controlled energy company. The Company realized a gain of \$15.6 million from the sale in the second quarter of 2005. MPX owns and operates the Termoceara Generating Facility in the Brazilian state of Ceara. Petrobras had entered into a contract to purchase all of the capacity and market all of the energy from the

| FERC FORM NO. 1 | (ED. 12-88) | Page 123.10 |

| | (1) <u>X</u> An Original | (Mo, Da, Yr) | · | | | | |
| MDU Resources Group, Inc. | (2) _ A Resubmission | 12/31/2005 | 2005/Q4 | | | | |
| NOTES TO FINANCIAL STATEMENTS (Continued) | | | | | | | |

Termoceara Generating Facility. The electric power sales contract with Petrobras was scheduled to expire in mid-2008.

The functional currency for the Termoceara Generating Facility was the Brazilian Real. The electric power sales contract with Petrobras contained an embedded derivative, which derived its value from an annual adjustment factor, which largely indexed the contract capacity payments to the U.S. dollar. The Company's 49 percent share of the gain from the change in fair value of the embedded derivative in the electric power sales contract for the year ended December 31, 2004, was \$2.5 million (after tax). The Company's 49 percent share of the loss from the change in fair value of the embedded derivative in the electric power sales contract for the year ended December 31, 2003, was \$11.3 million (after tax). The Company's 49 percent share of the foreign currency gain resulting from an increase in value of the Brazilian Real versus the U.S. dollar for the years ended December 31, 2004 and 2003, was \$1.9 million (after tax) and \$2.8 million (after tax), respectively.

In 2005, the Termoceara Generating Facility was accounted for as an asset held for sale and, as a result, no depreciation, depletion and amortization expense was recorded in 2005.

At December 31, 2005, the Company's equity method investments, including Carib Power and Hartwell, had total assets of \$231.9 million and long-term debt of \$154.8 million. At December 31, 2004, the Company's equity method investments, including MPX, Carib Power and Hartwell, had total assets of \$334.2 million and long-term debt of \$224.9 million. The Company's investment in its equity method investments, including the Trinity and Hartwell Generating Facilities, was approximately \$41.8 million, including undistributed earnings of \$3.5 million, at December 31, 2005. The Company's investment in the Termoceara, Trinity and Hartwell Generating Facilities was approximately \$65.7 million, including undistributed earnings of \$26.6 million, at December 31, 2004.

NOTE 3 - GOODWILL AND OTHER INTANGIBLE ASSETS The changes in the carrying amount of goodwill for the year ended December 31, 2005, were as follows:

Innovatum, which specializes in cable and pipeline magnetization and location, developed a hand-held locating device that can detect both magnetic and plastic materials, including unexploded ordnance. Innovatum was working with, and had demonstrated the device to, a Department of Defense contractor and had also met with individuals from the Department of Defense to discuss the possibility of using the hand-held locating device in their operations. In the third quarter of 2004, after communications with the Department of Defense and delays in further testing resulting from a Department of Defense request to enhance the hand-held locating device, Innovatum decreased its expected future cash flows from the hand-held locating device. This decrease, coupled with the downturn in the telecommunications and energy industries, resulted in a revised earnings forecast for Innovatum and, as a result, a goodwill impairment loss of \$4.0 million (before and after tax), which was included in asset impairments, was recognized in the third quarter of 2004. Innovatum, a reporting unit for goodwill impairment testing, is part of the pipeline and energy services segment. The fair value of Innovatum was estimated using the expected present value of future cash flows.

Other intangible assets at December 31, 2005 and 2004, were as follows:

| | 2005 | 2004 | |
|----------------------------------------------------------------------------|---------------------|---------------------|--|
| | (In thousands) | | |
| Amortizable intangible assets: Acquired contracts Accumulated amortization | \$18,065 (9,458) | \$15,041 (5,013) | |
| | 8,607 | 10,028 | |
| Noncompete agreements Accumulated amortization | 11,784 (8,557) | 10,575 (8,186) | |
| | 3,227 | 2,389 | |
| Other Accumulated amortization | 7,914 (1,213) | 9,535 (534) | |
| | 6,701 | 9,001 | |
| Unamortizable intangible assets | 524 | 851 | |
| Total | \$19,059 | \$22,269 | |

The unamortizable intangible assets were recognized in accordance with SFAS No. 87, which requires that if an additional minimum liability is recognized, an equal amount shall be recognized as an intangible asset provided that the asset recognized shall not exceed the amount of unrecognized prior service cost. The unamortizable intangible asset will be eliminated or adjusted as necessary upon a new determination of the amount of additional liability.

Amortization expense for amortizable intangible assets for the years ended December 31, 2005, 2004 and 2003, was \$5.5 million, \$3.8 million and \$2.2 million, respectively. Estimated amortization expense for amortizable intangible assets is \$3.5 million in 2006,

FERC FORM NO. 1 (ED. 12-88)

\$2.7 million in 2007, \$2.6 million in 2008, \$2.6 million in 2009, \$2.2 million in 2010 and \$4.9 million thereafter.

NOTE 4 - REGULATORY ASSETS AND LIABILITIES

The following table summarizes the individual components of unamortized regulatory assets and liabilities as of December 31:

| | 2005 | | 2004 |
|--------------------------------------------|----------------|---------|---------|
| | (In thou | isands) | |
| Regulatory assets: | | | |
| Deferred income taxes | \$ 38,757 | \$ | 39,212 |
| Plant costs | 13,122 | | 12,838 |
| Long-term debt refinancing costs | 3,160 | | 3,531 |
| Natural gas costs recoverable through rate | 691 | | 15,534 |
| adjustments | | | |
| Other | 6,519 | | 7,732 |
| Total regulatory assets | 62,249 | | 78,847 |
| Regulatory liabilities: | | | |
| Plant removal and decommissioning costs | 78,280 | | 78,525 |
| Taxes refundable to customers | 14,966 | | 15,660 |
| Deferred income taxes | 10,298 | | 15,192 |
| Liabilities for regulatory matters | 7,405 | | 18,853 |
| Other | 4,830 | | 3,676 |
| Total regulatory liabilities | 115,779 | | 131,906 |
| Net regulatory position | \$ (53,530) | \$(| 53,059) |

As of December 31, 2005, a large portion of the Company's regulatory assets, other than certain deferred income taxes, was being reflected in rates charged to customers and is being recovered over the next one to 17 years.

If, for any reason, the Company's regulated businesses cease to meet the criteria for application of SFAS No. 71 for all or part of their operations, the regulatory assets and liabilities relating to those portions ceasing to meet such criteria would be removed from the balance sheet and included in the statement of income as an extraordinary item in the period in which the discontinuance of SFAS No. 71 occurs.

NOTE 5 - DERIVATIVE INSTRUMENTS

Derivative instruments, including certain derivative instruments embedded in other contracts, are required to be recorded on the balance sheet as either an asset or liability measured at its fair value. Changes in the derivative instrument's fair value are recognized currently in earnings unless specific hedge accounting criteria are met. Special accounting for qualifying hedges allows derivative gains and losses to offset the related results on the hedged item in the income statement and requires that a company must formally document, designate and assess the effectiveness of transactions that receive hedge accounting treatment.

In the event a derivative instrument being accounted for as a cash flow hedge does not qualify for hedge accounting because it is no longer highly effective in offsetting changes in cash flows of a hedged item; if the derivative instrument expires or is sold, terminated or exercised; or if management determines that designation of the derivative instrument as a hedge instrument is no longer appropriate, hedge accounting would be discontinued and the derivative instrument would continue to be carried at fair value with changes in its fair value recognized in earnings. In these circumstances, the net gain or loss at the time of discontinuance of hedge accounting would remain in accumulated other comprehensive income (loss) until the period or periods during which the hedged forecasted transaction affects earnings, at which time the net gain or loss would be reclassified into earnings. In the event a cash flow hedge is discontinued because it is unlikely that a forecasted transaction will occur, the derivative instrument would continue to be

| MDU Resources Group, Inc. | (2) _ A Resubmission | 12/31/2005 | 2005/Q4 | | | | |
| NOTES TO FINANCIAL STATEMENTS (Continued) | | | | | | | |

carried on the balance sheet at its fair value, and gains and losses that had accumulated in other comprehensive income (loss) would be recognized immediately in earnings. In the event of a sale, termination or extinguishment of a foreign currency derivative, the resulting gain or loss would be recognized immediately in earnings. The Company's policy requires approval to terminate a derivative instrument prior to its original maturity.

As of December 31, 2005, Fidelity held derivative instruments designated as cash flow hedging instruments.

Hedging activities

Fidelity utilizes natural gas and oil price swap and collar agreements to manage a portion of the market risk associated with fluctuations in the price of natural gas and oil on its forecasted sales of natural gas and oil production. Each of the natural gas and oil price swap and collar agreements was designated as a hedge of the forecasted sale of natural gas and oil production.

The fair value of the hedging instruments must be estimated as of the end of each reporting period and is recorded on the Consolidated Balance Sheets as an asset or liability. Changes in the fair value attributable to the effective portion of hedging instruments, net of tax, are recorded in stockholders' equity as a component of accumulated other comprehensive income (loss). At the date the natural gas or oil production quantities are settled, the amounts accumulated in other comprehensive income (loss) are reported in the Consolidated Statements of Income. To the extent that the hedges are not effective, the ineffective portion of the changes in fair market value is recorded directly in earnings. Based on the recent rise in market prices of natural gas and oil, the fair value of the Company's derivative liability has increased significantly since December 31, 2004. The proceeds the Company receives for its natural gas and oil production are also generally based on market prices.

For the years ended December 31, 2005, 2004 and 2003, the amount of hedge ineffectiveness, which was included in operating revenues, was immaterial. For the years ended December 31, 2005, 2004 and 2003, Fidelity did not exclude any components of the derivative instruments' gain or loss from the assessment of hedge effectiveness and there were no reclassifications into earnings as a result of the discontinuance of hedges.

Gains and losses on derivative instruments that are reclassified from accumulated other comprehensive income (loss) to current-period earnings are included in the line item in which the hedged item is recorded. As of December 31, 2005, the maximum term of Fidelity's swap and collar agreements, in which Fidelity is hedging its exposure to the variability in future cash flows for forecasted transactions, is 12 months. The Company estimates that over the next 12 months, net losses of approximately \$25.8 million will be reclassified from accumulated other comprehensive loss into earnings, subject to changes in natural gas and oil market prices, as the hedged transactions affect earnings.

NOTE 6 - FAIR VALUE OF OTHER FINANCIAL INSTRUMENTS

The estimated fair value of the Company's long-term debt is based on quoted market prices of the same or similar issues. The estimated fair values of the Company's natural gas and oil price swap and collar agreements were included in current liabilities at December 31, 2005 and 2004. The estimated fair values of the Company's natural gas and oil price swap and collar agreements reflect the estimated amounts the Company would receive or pay to terminate the contracts at the reporting date based upon quoted market prices of comparable contracts.

The estimated fair value of the Company's long-term debt and natural gas and oil price swap and collar agreement obligations at December 31 was as follows:

| Less current maturities | 101,758 | 72,046 | | |
| Net long-term debt | \$1,104,752 | \$ 873,441 | | |

The amounts of scheduled long-term debt maturities for the five years and thereafter following December 31, 2005, aggregate \$101.8 million in 2006; \$106.9 million in 2007; \$161.3 million in 2008; \$86.9 million in 2009; \$266.8 million in 2010 and \$482.8 million thereafter.

Certain debt instruments of the Company and its subsidiaries, including those discussed below, contain restrictive covenants, all of which the Company and its subsidiaries were in compliance with at December 31, 2005.

MDU Resources Group, Inc.

The Company has a revolving credit agreement with various banks totaling \$100 million (with provision for an increase, at the option of the Company on stated conditions, up to a maximum of \$125 million). There were no amounts outstanding under the credit agreement at December 31, 2005 and 2004. The credit agreement supports the Company's \$100 million (previously \$75 million) commercial paper program. Under the Company's commercial paper program, \$60.0 million and \$37.0 million were outstanding at December 31, 2005 and 2004, respectively, which was classified as long-term debt. The commercial paper borrowings are classified as long-term debt as they are intended to be refinanced on a long-term basis

| NOTES TO FINANCIAL STATEMENTS (Continued) | | | | | | |

through continued commercial paper borrowings (supported by the credit agreement, which expires in June 2010).

In order to borrow under the Company's credit agreement, the Company must be in compliance with the applicable covenants and certain other conditions, including covenants not to permit, as of the end of any fiscal quarter, (A) the ratio of funded debt to total capitalization (determined on a consolidated basis) to be greater than 65 percent or (B) the ratio of funded debt to capitalization (determined with respect to the Company alone, excluding its subsidiaries) to be greater than 65 percent. Also included is a covenant that does not permit the ratio of the Company's earnings before interest, taxes, depreciation and amortization to interest expense (determined with respect to the Company alone, excluding its subsidiaries), for the 12-month period ended each fiscal quarter, to be less than 2.5 to 1. Other covenants include restrictions on the sale of certain assets and on the making of certain investments. The Company was in compliance with these covenants and met the required conditions at December 31, 2005. In the event the Company does not comply with the applicable covenants and other conditions, alternative sources of funding may need to be pursued, as previously described.

There are no credit facilities that contain cross-default provisions between the Company and any of its subsidiaries.

The Company's issuance of first mortgage debt is subject to certain restrictions imposed under the terms and conditions of its Indenture of Mortgage. Generally, those restrictions require the Company to fund \$1.43 of unfunded property or use \$1.00 of refunded bonds for each dollar of indebtedness incurred under the Indenture and, in some cases, to certify to the trustee that annual earnings (pretax and before interest charges), as defined in the Indenture, equal at least two times its annualized first mortgage bond interest costs. Under the more restrictive of the tests, as of December 31, 2005, the Company could have issued approximately \$364 million of additional first mortgage bonds.

Approximately \$430.7 million in net book value of the Company's net electric and natural gas distribution properties at December 31, 2005, with certain exceptions, are subject to the lien of the Indenture of Mortgage dated May 1, 1939, as supplemented, amended and restated, from the Company to The Bank of New York and Douglas J. MacInnes, successor trustee, and are subject to the junior lien of the Indenture dated as of December 15, 2003, as supplemented, from the Company to The Bank of New York, as trustee.

Centennial Energy Holdings, Inc.

Centennial has three revolving credit agreements with various banks and institutions totaling \$441.4 million with certain provisions allowing for increased borrowings. These credit agreements support Centennial's \$350 million commercial paper program. There were no outstanding borrowings under the Centennial credit agreements at December 31, 2005 or 2004. Under the Centennial commercial paper program, \$200.0 million and \$26.0 million were outstanding at December 31, 2005 and 2004, respectively. The Centennial commercial paper borrowings are classified as long-term debt as Centennial intends to refinance these borrowings on a long-term basis through continued Centennial commercial paper borrowings (supported by Centennial credit agreements). One of these credit agreements is for \$400 million, which includes a provision for an increase, at the option of Centennial on stated conditions, up to a maximum of \$450 million and expires on August 26, 2010. Another agreement is for \$21.4 million and expires on April 30, 2007. Pursuant to this credit agreement, on the last business day of April 2006, the line of credit will be reduced by \$3.6 million. Centennial intends to negotiate the extension or replacement of these agreements prior to their maturities. The third agreement is an uncommitted line for \$20 million, which was effective on January 27, 2006, and may be terminated by the bank at any time. As of December 31, 2005, \$32.3 million of letters of credit were outstanding, as discussed in Note 18, of which \$14.9 million were outstanding under the above credit agreements that reduced amounts available under these agreements.

Centennial has an uncommitted long-term master shelf agreement that allows for borrowings of up to \$450 million. Under the terms of the master shelf agreement, \$447.5 million and

| Name of Respondent | This Report is: | Date of Report | Year/Period of Report | | | |
|-------------------------------------------|--------------------------|----------------|-----------------------|--|--|--|
| | (1) <u>X</u> An Original | (Mo, Da, Yr) | · | | | |
| MDU Resources Group, Inc. | (2) _ A Resubmission | 12/31/2005 | 2005/Q4 | | | |
| NOTES TO FINANCIAL STATEMENTS (Continued) | | | | | | |

\$384.0 million were outstanding at December 31, 2005 and 2004, respectively. The ability to request additional borrowings under this master shelf agreement expires in April 2008. To meet potential future financing needs, Centennial may pursue other financing arrangements, including private and/or public financing.

In order to borrow under Centennial's credit agreements and the Centennial uncommitted long-term master shelf agreement, Centennial and certain of its subsidiaries must be in compliance with the applicable covenants and certain other conditions, including covenants not to permit, as of the end of any fiscal quarter, the ratio of total debt to total capitalization to be greater than 65 percent (for the \$400 million credit agreement) and 60 percent (for the \$21.4 million credit agreement and the master shelf agreement). Also included is a covenant that does not permit the ratio of the Company's earnings before interest, taxes, depreciation and amortization to interest expense, for the 12-month period ended each fiscal quarter, to be less than 2.5 to 1 (for the \$400 million credit agreement), 2.25 to 1 (for the \$21.4 million credit agreement) and 1.75 to 1 (for the master shelf agreement). Other covenants include minimum consolidated net worth, limitation on priority debt and restrictions on the sale of certain assets and on the making of certain loans and investments. Centennial and such subsidiaries were in compliance with these covenants and met the required conditions at December 31, 2005. In the event Centennial or such subsidiaries do not comply with the applicable covenants and other conditions, alternative sources of funding may need to be pursued as previously described.

Certain of Centennial's financing agreements contain cross-default provisions. These provisions state that if Centennial or any subsidiary of Centennial fails to make any payment with respect to any indebtedness or contingent obligation, in excess of a specified amount, under any agreement that causes such indebtedness to be due prior to its stated maturity or the contingent obligation to become payable, the applicable agreements will be in default. Certain of Centennial's financing agreements and Centennial's practice limit the amount of subsidiary indebtedness.

Williston Basin Interstate Pipeline Company Williston Basin has an uncommitted long-term master shelf agreement that allows for borrowings of up to \$100 million. Under the terms of the master shelf agreement, \$55.0 million was outstanding at December 31, 2005 and 2004. The ability to request additional

borrowings under this master shelf agreement expires on December 20, 2007.

In order to borrow under its uncommitted long-term master shelf agreement, Williston Basin must be in compliance with the applicable covenants and certain other conditions, including covenants not to permit, as of the end of any fiscal quarter, the ratio of total debt to total capitalization to be greater than 55 percent. Other covenants include limitation on priority debt and some restrictions on the sale of certain assets and the making of certain investments. Williston Basin was in compliance with these covenants and met the required conditions at December 31, 2005. In the event Williston Basin does not comply with the applicable covenants and other conditions, alternative sources of funding may need to be pursued.

NOTE 8 - ASSET RETIREMENT OBLIGATIONS

The Company adopted SFAS No. 143 on January 1, 2003. The Company recorded obligations related to the plugging and abandonment of natural gas and oil wells, decommissioning of certain electric generating facilities, reclamation of certain aggregate properties and certain other obligations associated with leased properties. Upon adoption of SFAS No. 143, the Company recorded an additional discounted liability of \$22.5 million and a regulatory asset of \$493,000, increased net property, plant and equipment by \$9.6 million and recognized a one-time cumulative effect charge of \$7.6 million (net of deferred income tax benefits of \$4.8 million).

The Company adopted FIN 47 on December 31, 2005, as discussed in Note 1. The Company recorded obligations related to special handling and disposal of hazardous materials at certain electric generating and distribution facilities, natural gas distribution and

| Name of Respondent | This Report is: | Date of Report | Year/Period of Report | | | |

| NOTES TO FINANCIAL STATEMENTS (Continued) | | | | | | |

transmission facilities, and buildings. Upon adoption of FIN 47, the Company recorded an additional discounted liability of \$1.7 million and a regulatory asset of \$1.5 million and increased net property, plant and equipment by \$151,000. There was no impact on net income; therefore pro forma presentation amounts assuming retroactive application of the accounting change on net income are not necessary.

A reconciliation of the Company's liability, which is included in other liabilities, for the years ended December 31 was as follows:

| | 2005 | 2004 | |
|----------------------------------------------|----------------|-----------|--|
| | (In thousands) | | |
| Balance at beginning of year | \$ 37,350 | \$ 34,633 | |
| Liabilities incurred | 3,786 | 3,718 | |
| Liabilities acquired | 1,138 | 178 | |
| Liabilities settled | (3,328) | (2,286) | |
| Accretion expense | 2,241 | 1,931 | |
| Revisions in estimates | 740 | (824) | |
| Liabilities recorded upon adoption of FIN 47 | 1,663 | | |
| Other | 47 | | |
| Balance at end of year | \$ 43,637 | \$ 37,350 | |

The following reconciliation of the Company's liability for the years ended December 31 includes the pro forma effects of the adoption of FIN 47 for all years presented.

| | 2005 | 2004 |
|------------------------------|-----------|-----------|
| | (In tho | usands) |
| Balance at beginning of year | \$ 38,924 | \$ 36,122 |
| Liabilities incurred | 3,786 | 3,718 |
| Liabilities acquired | 1,138 | 178 |
| Liabilities settled | (3,328) | (2,286) |
| Accretion expense | 2,241 | 1,931 |
| Revisions in estimates | 740 | (824) |
| Other | 136 | 85 |
| Balance at end of year | \$ 43,637 | \$ 38,924 |

The Company believes that any expenses under SFAS No. 143 and FIN 47 as they relate to regulated operations will be recovered in rates over time and, accordingly, deferred such expenses as a regulatory asset upon adoption. The Company will continue to defer those expenses that it believes will be recovered in rates over time.

The fair value of assets that are legally restricted for purposes of settling asset retirement obligations at December 31, 2005 and 2004, was \$5.1 million and \$5.2 million, respectively.

NOTE 9 - PREFERRED STOCKS

Preferred stocks at December 31 were as follows:

Outstanding:

 4.50% Series - 100,000 shares
 \$10,000

 4.70% Series - 50,000 shares
 5,000

 Total preferred stocks
 \$15,000

The 4.50% Series and 4.70% Series preferred stocks outstanding are subject to redemption, in whole or in part, at the option of the Company with certain limitations on 30 days notice on any quarterly dividend date at a redemption price, plus accrued dividends, of \$105 per share and \$102 per share, respectively.

In the event of a voluntary or involuntary liquidation, all preferred stock series holders are entitled to \$100 per share, plus accrued dividends.

The affirmative vote of two-thirds of a series of the Company's outstanding preferred stock is necessary for amendments to the Company's charter or bylaws that adversely affect that series; creation of or increase in the amount of authorized stock ranking senior to that series (or an affirmative majority vote where the authorization relates to a new class of stock that ranks on parity with such series); a voluntary liquidation or sale of substantially all of the Company's assets; a merger or consolidation, with certain exceptions; or the partial retirement of that series of preferred stock when all dividends on that series of preferred stock have not been paid. The consent of the holders of a particular series is not required for such corporate actions if the equivalent vote of all outstanding series of preferred stock voting together has consented to the given action and no particular series is affected differently than any other series.

Subject to the foregoing, the holders of common stock exclusively possess all voting power. However, if cumulative dividends on preferred stock are in arrears, in whole or in part, for one year, the holders of preferred stock would obtain the right to one vote per share until all dividends in arrears have been paid and current dividends have been declared and set aside.

NOTE 10 - COMMON STOCK

On August 14, 2003, the Company's Board of Directors approved a three-for-two common stock split to be effected in the form of a 50 percent common stock dividend. The additional shares of common stock were distributed on October 29, 2003, to common stockholders of record on October 10, 2003. Common stock information appearing in the accompanying consolidated financial statements has been restated to give retroactive effect to the stock split. Additionally, preference share purchase rights have been appropriately adjusted to reflect the effects of the split.

In 1998, the Company's Board of Directors declared, pursuant to a stockholders' rights plan, a dividend of one preference share purchase right (right) for each outstanding share of the Company's common stock. Each right becomes exercisable, upon the occurrence of certain events, for two-thirds of one one-thousandth of a share of Series B Preference Stock of the Company, without par value, at an exercise price of \$125, subject to certain adjustments. The rights are currently not exercisable and will be exercisable only if a person or group (acquiring person) either acquires ownership of 15 percent or more of the Company's common stock or commences a tender or exchange offer that would result in ownership of 15 percent or more. In the event the Company is acquired in a merger or other business combination transaction or 50 percent or more of its consolidated assets or earnings power are sold, each right entitles the holder to receive, upon the exercise thereof at the then current exercise price of the right multiplied by the number of two-thirds of one one-thousandth of a share of Series B Preference Stock for which a right is then exercisable, in accordance with the terms of the rights agreement, such number of shares of common stock of the acquiring person having a market value of twice the then current exercise price of the right. The rights, which expire on December 31, 2008, are redeemable in whole, but not in part, for a price of \$.00667 per right, at the Company's option at any time until any acquiring person has acquired 15 percent or more of the Company's common stock.

| Name of Respondent | This Report is: | Date of Report | Year/Period of Report | | |

| MDU Resources Group, Inc. | (2) _ A Resubmission | 12/31/2005 | 2005/Q4 | | |
| NOTES TO FINANCIAL STATEMENTS (Continued) | | | | | |

The Stock Purchase Plan provides interested investors the opportunity to make optional cash investments and to reinvest all or a percentage of their cash dividends in shares of the Company's common stock. The K-Plan is partially funded with the Company's common stock. Since January 1, 2003, the Stock Purchase Plan and K-Plan, with respect to Company stock, have been funded by the purchase of shares of common stock on the open market. At December 31, 2005, there were 12.1 million shares of common stock reserved for original issuance under the Stock Purchase Plan and K-Plan.

NOTE 11 - STOCK-BASED COMPENSATION

The Company has stock option plans for directors, key employees and employees. In 2003, the Company adopted the fair value recognition provisions of SFAS No. 123 and began expensing the fair market value of stock options for all awards granted on or after January 1, 2003. As permitted by SFAS No. 148, the Company accounts for stock options granted prior to January 1, 2003, under APB Opinion No. 25.

For a discussion of the adoption of SFAS No. 123 and the effect on earnings and earnings per common share for the years ended December 31, 2005, 2004 and 2003, as if the Company had applied SFAS No. 123 and recognized compensation expense for all outstanding and unvested stock options based on the fair value at the date of grant, see Note 1.

Options granted to key employees automatically vest after nine years, but the plan provides for accelerated vesting based on the attainment of certain performance goals or upon a change in control of the Company, and expire 10 years after the date of grant. Options granted to directors and employees vest at date of grant and three years after date of grant, respectively, and expire 10 years after the date of grant.

A summary of the status of the stock option plans at December 31, 2005, 2004 and 2003, and changes during the years then ended were as follows:

| | 200 |)5 | 2004 | : | 200 | 13 |

| NOTES TO FINANCIAL STATEMENTS (Continued) | | | | | |

Balance at end of year 1,857,982 4.8 19.48 1,093,523 18.86

The fair value of each option is estimated on the date of grant using the Black-Scholes option pricing model. The weighted average fair value of the options granted and the assumptions used to estimate the fair value of options were as follows:

| | 2005 | 2004 | 2003 |
|--------------------------------------------|------|------|--------|
| Weighted average fair value of options | | | |
| at grant date | | | \$4.67 |
| Weighted average risk-free interest rate | | | 3.91% |
| Weighted average expected price volatility | | | 32.28% |
| Weighted average expected dividend yield | | | 3.43% |
| Expected life in years | | | 7 |

In addition, prior to 2002 the Company granted restricted stock awards under a long-term incentive plan and deferred compensation agreements. The restricted stock awards granted vest to the participants at various times ranging from one year to nine years from date of issuance, but certain grants may vest early based upon the attainment of certain performance goals or upon a change in control of the Company. The Company also has granted stock awards totaling 28,586 shares, 35,205 shares and 31,855 shares in 2005, 2004 and 2003, respectively, under a nonemployee director stock compensation plan. The weighted average grant date fair value of the stock grants was \$28.32, \$23.61 and \$21.40 in 2005, 2004 and 2003, respectively. Nonemployee directors may receive shares of common stock instead of cash in payment for directors' fees under the nonemployee director stock compensation plan. Compensation expense recognized for restricted stock grants and stock grants was \$1.8 million, \$3.4 million and \$4.8 million in 2005, 2004 and 2003, respectively.

In 2005, 2004 and 2003, key employees of the Company were awarded performance share awards. Entitlement to performance shares is based on the Company's total shareholder return over designated performance periods as measured against a selected peer group. Target grants of performance shares were made for the following performance periods:

| Grant Date | Performance Period | Target Grant of Shares |
|---------------|--------------------|---------------------------|
| February 2003 | 2003-2005 | 54,180 |
| February 2004 | 2004-2006 | 185,743 |
| February 2005 | 2005-2007 | 182,927 |

Participants may earn additional performance shares if the Company's total shareholder return exceeds that of the selected peer group. The final value of the performance units may vary according to the number of shares of Company stock that are ultimately granted based on the performance criteria. Compensation expense recognized for the performance share awards for the years ended December 31, 2005, 2004 and 2003, was \$3.6 million, \$2.5 million and \$879,000, respectively.

The Company is authorized to grant options, restricted stock and stock for up to 12.7 million shares of common stock and has granted options, restricted stock and stock on 5.8 million shares through December 31, 2005.

NOTE 12 - INCOME TAXES

The components of income before income taxes for each of the years ended December 31 were as follows:

| ı | CED | CE | | NO 1 | /ED | 12-88) |

| Foreign | (189) | 955 | 264 |
| | \$115,539 | 60,811 | 33,985 |
| Deferred: | | | |
| Income taxes - | | | |
| Federal | 25,726 | 28,556 | 55,660 |
| State | 5,014 | 5,422 | 9,861 |
| Foreign | | (223) | (338) |
| Investment tax credit | (500) | (592) | (596) |
| | 30,240 | 33,163 | 64,587 |
| Total income tax expense | \$145,779 | \$93,974 | \$98,572 |

Components of deferred tax assets and deferred tax liabilities recognized at December 31 were as follows:

| | 2005 | 2004 |
|------------------------------------------------------|-------------|-------------|
| | (In thou | sands) |
| Deferred tax assets: | | |
| Regulatory matters | \$ 38,757 | \$ 39,212 |
| Accrued pension costs | 22,000 | 18,754 |
| Natural gas and oil price swap and collar agreements | 16,375 | 2,734 |
| Deferred compensation | 13,057 | 9,938 |
| Asset retirement obligations | 13,017 | 12,197 |
| Bad debts | 2,804 | 2,266 |
| Deferred investment tax credit | 530 | 724 |
| Other | 31,288 | 26,503 |
| Total deferred tax assets | 137,828 | 112,328 |
| Deferred tax liabilities: | | |
| Depreciation and basis differences on property, | | |
| plant and equipment | 465,637 | 450,237 |
| Basis differences on natural gas and oil | | |
| producing properties | 159,077 | 124,788 |
| Regulatory matters | 10,298 | 15,192 |
| Other | 19,930 | 13,826 |
| Total deferred tax liabilities | 654,942 | 604,043 |
| Net deferred income tax liability | \$(517,114) | \$(491,715) |

As of December 31, 2005 and 2004, no valuation allowance has been recorded associated with the above deferred tax assets.

The following table reconciles the change in the net deferred income tax liability from December 31, 2004, to December 31, 2005, to deferred income tax expense:

| FERC | FORM | NO. 1 | (ED. | 12-88) |
|------|------|-------|------|--------|
| | | | | |

| Name of Respondent | This Report is: | Date of Report | Year/Period of Report |
|---------------------------|------------------------------------------|----------------|-----------------------|
| | (1) <u>X</u> An Original | (Mo, Da, Yr) | · |
| MDU Resources Group, Inc. | (2) _ A Resubmission | 12/31/2005 | 2005/Q4 |
| | NOTES TO FINANCIAL STATEMENTS (Continued |) | |

| | 2005 |
|-----------------------------------------------------------|----------------|
| | (In thousands) |
| Change in net deferred income tax | |
| liability from the preceding table | \$25,399 |
| Deferred taxes associated with other comprehensive income | 13,304 |
| Deferred taxes associated with acquisitions | (6,825) |
| Other | (1,638) |
| Deferred income tax expense for the period | \$30,240 |

Total income tax expense differs from the amount computed by applying the statutory federal income tax rate to income before taxes. The reasons for this difference were as follows:

| Years ended December 31, | 2005 | 2005 2004 | | | 200 | 3 |
|--------------------------|------------|-----------|--------------|-----------|----------|-------|
| | Amount | 웅 | Amount | ક | Amount | ક |
| | | (L | ollars in th | nousands) | | |
| Computed tax at federal | | | | | | |
| statutory rate | \$ 147,302 | 35.0 | \$105,364 | 35.0 | \$98,520 | 35.0 |
| Increases (reductions) | | | | | | |
| resulting from: | | | | | | |
| State income taxes, | | | | | | |
| net of federal | | | | | | |
| income tax benefit | 15,459 | 3.7 | 11,468 | 3.8 | 11,857 | 4.2 |
| Depletion allowance | (4,381) | (1.1) | (3,418) | (1.2) | (3,117) | (1.1) |
| Foreign operations | (4,209) | (1.0) | (5,648) | (1.9) | (832) | (.3) |
| Renewable electricity | | | | , | (/ | (/ |
| production credit | (4,087) | (1.0) | (3,404) | (1.1) | (3,395) | (1.2) |
| Audit resolution | | | (8,818) | (2.9) | | |
| Other items | (4,305) | (1.0) | (1,570) | (.5) | (4,461) | (1.6) |
| Total income tax expense | \$ 145,779 | 34.6 | \$93,974 | 31.2 | \$98,572 | 35.0 |

In 2004, the Company resolved federal and related state income tax matters for the 1998 through 2000 tax years. The Company reflected the effects of this tax resolution and, in addition, reversed liabilities that had previously been provided and were deemed to be no longer required, which resulted in a benefit of \$8.3 million (after tax), including interest.

The Company considers earnings (including the gain from the sale of its foreign equity method investment in a natural gas-fired electric generating facility in Brazil) to be reinvested indefinitely outside of the United States and, accordingly, no U.S. deferred income taxes are recorded with respect to such earnings. Should the earnings be remitted as dividends, the Company may be subject to additional U.S. taxes, net of allowable foreign tax credits. The cumulative undistributed earnings at December 31, 2005, were approximately \$36 million. The amount of unrecognized deferred tax liability associated with the undistributed earnings was approximately \$9.5 million.

NOTE 13 - BUSINESS SEGMENT DATA

The Company's reportable segments are those that are based on the Company's method of internal reporting, which generally segregates the strategic business units due to differences in products, services and regulation. The vast majority of the Company's operations are located within the United States. The Company also has investments in foreign countries, which largely consist of investments in natural resource-based projects.

The electric segment generates, transmits and distributes electricity in Montana, North Dakota, South Dakota and Wyoming. The natural gas distribution segment distributes natural gas in those states as well as in western Minnesota. These operations also supply related value-added products and services.

FERC FORM NO. 1 (ED. 12-88)

Page 123.23

| Name of Respondent | This Report is: | Date of Report | Year/Period of Report |

| MDU Resources Group, Inc. | (2) _ A Resubmission | 12/31/2005 | 2005/Q4 |
| | NOTES TO FINANCIAL STATEMENTS (Continued |) | |

The construction services segment specializes in electrical line construction, pipeline construction, inside electrical wiring and cabling and the manufacture and distribution of specialty equipment.

The pipeline and energy services segment provides natural gas transportation, underground storage and gathering services through regulated and nonregulated pipeline systems primarily in the Rocky Mountain and northern Great Plains regions of the United States. The pipeline and energy services segment also provides energy-related management services, including cable and pipeline magnetization and locating.

The natural gas and oil production segment is engaged in natural gas and oil acquisition, exploration, development and production activities primarily in the Rocky Mountain and Mid-Continent regions of the United States and in and around the Gulf of Mexico.

The construction materials and mining segment mines aggregates and markets crushed stone, sand, gravel and related construction materials, including ready-mixed concrete, cement, asphalt and other value-added products, as well as performs integrated construction services, in the central and western United States and in Alaska and Hawaii.

The independent power production segment owns, builds and operates electric generating facilities in the United States and has investments in domestic and international natural resource-based projects. Electric capacity and energy produced at its power plants primarily are sold under mid-and long-term contracts to nonaffiliated entities.

The information below follows the same accounting policies as described in the Summary of Significant Accounting Policies. Information on the Company's businesses as of December 31 and for the years then ended was as follows:

| | 2005 | | 2004 | | 2003 |

- * Includes allocations of common utility property.
- ** Includes assets not directly assignable to a business (i.e. cash and cash equivalents, certain accounts receivable, certain investments and other miscellaneous current and deferred assets).

Excluding the asset impairments at pipeline and energy services of \$5.3 million (after tax) in 2004, earnings (loss) from electric, natural gas distribution and pipeline and energy services are substantially all from regulated operations. Earnings from construction services, natural gas and oil production, construction materials and mining, independent power production, and other are all from nonregulated operations. Capital expenditures for 2005, 2004 and 2003 include noncash transactions, including the issuance of the Company's equity securities in connection with acquisitions. The noncash transactions were \$46.5 million, \$33.1 million and \$42.4 million in 2005, 2004 and 2003, respectively.

NOTE 14 - ACQUISITIONS

In 2005, the Company acquired construction services businesses in Nevada, natural gas and oil production properties in southern Texas and construction materials and mining businesses in Idaho, Iowa and Oregon, none of which was material. The total purchase

FERC FORM NO. 1 (ED. 12-88)

| | NOTES TO FINANCIAL STATEMENTS (Continued | | |

consideration for these businesses and properties and purchase price adjustments with respect to certain other acquisitions acquired prior to 2005, consisting of the Company's common stock and cash, was \$245.2 million.

In 2004, the Company acquired a number of businesses including construction materials and mining businesses in Hawaii, Idaho, Iowa and Minnesota and an independent power production operating and development company in Colorado, none of which was material. The total purchase consideration for these businesses and purchase price adjustments with respect to certain other acquisitions acquired prior to 2004, consisting of the Company's common stock and cash, was \$70.3 million.

In 2003, the Company acquired a number of businesses including construction materials and mining businesses in Montana, North Dakota and Texas and a wind-powered electric generating facility in California, none of which was material. The total purchase consideration for these businesses and purchase price adjustments with respect to certain other acquisitions acquired in 2002, consisting of the Company's common stock and cash, was \$175.0 million.

The above acquisitions were accounted for under the purchase method of accounting and, accordingly, the acquired assets and liabilities assumed have been preliminarily recorded at their respective fair values as of the date of acquisition. On certain of the above acquisitions made in 2005, final fair market values are pending the completion of the review of the relevant assets, liabilities and issues identified as of the acquisition date. The results of operations of the acquired businesses and properties are included in the financial statements since the date of each acquisition. Pro forma financial amounts reflecting the effects of the above acquisitions are not presented, as such acquisitions were not material to the Company's financial position or results of operations.

NOTE 15 - EMPLOYEE BENEFIT PLANS

The Company has noncontributory defined benefit pension plans and other postretirement benefit plans for certain eligible employees. Effective January 1, 2006, the Company discontinued defined pension plan benefits to all nonunion and certain union employees hired after December 31, 2005. These employees that would have been eligible for defined pension plan benefits are eligible to receive additional defined contribution plan benefits. The Company uses a measurement date of December 31 for all of its pension and postretirement benefit plans. The Company recognized the effects of the 2003 Medicare Act during the second quarter of 2004. The net periodic benefit cost for 2004 reflects the effects of the 2003 Medicare Act. Changes in benefit obligation and plan assets for the years ended December 31 and amounts recognized in the Consolidated Balance Sheets at December 31 were as follows:

| | Pension Benefits | | | her irement fits |
|-----------------------------------|---------------------|-----------|----------|------------------------|

| | | | | | | |

Employer contributions and benefits paid in the above table include only those amounts contributed directly to, or paid directly from, plan assets.

Unrecognized pension actuarial losses in excess of 10 percent of the greater of the projected benefit obligation or the market-related value of assets is amortized on a straight-line basis over the expected average remaining service lives of active participants. Unrecognized postretirement net transition obligation is amortized over a 20-year period ending 2012.

The accumulated benefit obligation for the defined benefit pension plans reflected above was \$244.3 million and \$227.3 million at December 31, 2005 and 2004, respectively.

The projected benefit obligation, accumulated benefit obligation and fair value of plan assets for the pension plans with accumulated benefit obligations in excess of plan assets at December 31, 2005 and 2004, were as follows:

| | 2005 | 2004 |
|-------------------------------------------------------------|---------------------------------|--------------------------------------|
| Projected benefit obligation Accumulated benefit obligation | (In : \$190,877 \$151,399 | thousands) \$174,983 \$136,012 |
| Fair value of plan assets | \$139,108 | \$132,280 |

Components of net periodic benefit cost for the Company's pension and other postretirement benefit plans were as follows:

| Name of Respondent | This Report is: | Date of Report | Year/Period of Report | |

| Expected return on assets Amortization of prior | (19,947) | (20,375) | (20,730) | (4,005) | (3,943) | (3,933) |
| service cost Recognized net actuarial | 1,025 | 1,121 | 1,156 | 45 | 144 | 48 |
| (gain) loss Amortization of net transition | 1,385 | 480 | (417) | (549) | (233) | (255) |
| obligation (asset) | (45) | (250) | (950) | 2,126 | 2,151 | 2,151 |
| Net periodic benefit cost Less amount capitalized | 7,371 730 | 4,546 409 | 167 14 | 3,120 313 | 4,257 440 | 5,149 |
| Net periodic benefit cost | \$ 6,641 | \$4,137 | \$ 153 | \$ 2,807 | \$3,817 | \$4,548 |

Weighted average assumptions used to determine benefit obligations at December 31 were as follows:

| | | ension nefits | | Other stretirement Benefits |
|------------------------------------------------|----------------|------------------|----------------|-----------------------------------|
| | 2005 | 2004 | 2005 | 2004 |
| Discount rate Rate of compensation increase | 5.50% 4.30% | 5.75% 4.70% | 5.50% 4.50% | 5.75% 4.50% |

Weighted average assumptions used to determine net periodic benefit cost for the years ended December 31 were as follows:

| | | ension nefits | | Other tretirement Benefits |
|--------------------------------|-------|------------------|-------|----------------------------------|
| | 2005 | 2004 | 2005 | 2004 |
| Discount rate | 5.75% | 6.00% | 5.75% | 6.00% |
| Expected return on plan assets | 8.50% | 8.50% | 7.50% | 7.50% |
| Rate of compensation increase | 4.70% | 4.70% | 4.50% | 4.50% |

The expected rate of return on plan assets is based on the targeted asset allocation of 70 percent equity securities and 30 percent fixed income securities and the expected rate of return from these asset categories. The expected return on plan assets for other postretirement benefits reflects insurance-related investment costs.

Health care rate assumptions for the Company's other postretirement benefit plans as of December 31 were as follows:

| | 2005 | 2004 |
|----------------------------------------------|-----------|-----------|
| Health care trend rate assumed for next year | 6.0%-9.5% | 6.0%-9.5% |
| Health care cost trend rate - ultimate | 5.0%-6.0% | 5.0%-6.0% |
| Year in which ultimate trend rate achieved | 1999-2014 | 1999-2013 |

| FERC FORM NO. 1 (ED | . 12-88) | Page 123.29 | |

| NOTES TO FINANCIAL STATEMENTS (Continued) | | | | |

The Company's other postretirement benefit plans include health care and life insurance benefits for certain employees. The plans underlying these benefits may require contributions by the employee depending on such employee's age and years of service at retirement or the date of retirement. The accounting for the health care plans anticipates future cost-sharing changes that are consistent with the Company's expressed intent to generally increase retiree contributions each year by the excess of the expected health care cost trend rate over 6 percent.

Assumed health care cost trend rates may have a significant effect on the amounts reported for the health care plans. A one percentage point change in the assumed health care cost trend rates would have had the following effects at December 31, 2005:

| | Point Increase | 1 Percentage Point Decrease | | |
|---------------------------------------------|----------------|--------------------------------|--|--|
| Effect on total of service | (In thousands) | | | |
| and interest cost components | \$ (77) | \$ (770) | | |
| Effect on postretirement benefit obligation | \$441 | \$(7,499) | | |

The Company's defined benefit pension plans' asset allocation at December 31, 2005 and 2004, and weighted average targeted asset allocations at December 31, 2005, were as follows:

| | Percent of Pl Asset | tage an | Weighted Average Targeted Asset Allocation Percentage |
|----------------------------|---------------------------|------------|----------------------------------------------------------------|
| Asset Category | 2005 | 2004 | 2005 |
| Equity securities | 74% | 74% | 70% |

| Other | 5 | 2 | |
| Total | 100% | 100% | 100% |
| * Includes target for both | fixed income | securities | and other. |

The Company's pension assets are managed by 10 outside investment managers. The Company's other postretirement assets are managed by one outside investment manager. The Company's investment policy with respect to pension and other postretirement assets is to make investments solely in the interest of the participants and beneficiaries of the plans and for the exclusive purpose of providing benefits accrued and defraying the reasonable expenses of administration. The Company strives to maintain investment diversification to assist in minimizing the risk of large losses. The Company's policy guidelines allow for investment of funds in cash equivalents, fixed income securities and equity securities. The guidelines prohibit investment in commodities and future contracts, equity private placement, employer securities, leveraged or derivative securities, options, direct real estate investments, precious metals, venture capital and limited partnerships. The guidelines also prohibit short selling and margin transactions. The Company's practice is to periodically review and rebalance asset categories based on its targeted asset allocation percentage policy.

The Company's other postretirement benefit plans' asset allocation at December 31, 2005 and 2004, and weighted average targeted asset allocation at December 31, 2005, were as follows:

| Name of Respondent | This Report is: | Date of Report | Year/Period of Report | | | |

* Includes target for both fixed income securities and other.

The Company expects to contribute approximately \$1.2 million to its defined benefit pension plans and approximately \$3.3 million to its postretirement benefit plans in 2006.

The following benefit payments, which reflect future service, as appropriate, are expected to be paid:

| Years | Pension Benefits | Other Postretirement Benefits |
|-----------|---------------------|-------------------------------------|
| | (In the | ousands) |
| 2006 | \$ 13,118 | \$ 4,172 |
| 2007 | 13,554 | 4,344 |
| 2008 | 14,130 | 4,478 |
| 2009 | 14,915 | 4,675 |
| 2010 | 15,899 | 4,897 |
| 2011-2015 | 95,429 | 27,848 |

The following Medicare Part D subsidies are expected: \$288,000 in 2006; \$589,000 in 2007; \$620,000 in 2008; \$650,000 in 2009; \$682,000 in 2010; and \$4.0 million during the years 2011 through 2015.

In addition to company-sponsored plans, certain employees are covered under multi-employer defined benefit plans administered by a union. Amounts contributed to the multi-employer plans were \$39.6 million, \$28.2 million and \$27.2 million in 2005, 2004 and 2003, respectively.

In addition to the qualified plan defined pension benefits reflected in the table at the beginning of this note, the Company also has an unfunded, nonqualified benefit plan for executive officers and certain key management employees that generally provides for defined benefit payments at age 65 following the employee's retirement or to their beneficiaries upon death for a 15-year period. Investments, at December 31, 2005, consisted of cash equivalents, fixed income securities, equity securities, and life insurance carried on plan participants, which is payable to the Company upon the employee's death. The Company's net periodic benefit cost for this plan was \$7.4 million, \$7.5 million and \$5.3 million in 2005, 2004 and 2003, respectively. The total projected obligation for this plan was \$64.9 million and \$65.3 million at December 31, 2005 and 2004, respectively. The accumulated benefit obligation for this plan was \$55.0 million and \$52.3 million at December 31, 2005 and 2004, respectively. The additional minimum liability relating to this plan was \$11.6 million and \$14.3 million at December 31, 2005 and 2004, respectively. The Company had no related intangible asset as of December 31, 2005, and had a related intangible asset recognized as of December 31, 2004, of \$851,000. A discount rate of 5.50 percent and 5.75 percent at December 31, 2005 and 2004, respectively, and a rate of compensation increase of 4.25 percent and 4.75 percent at December 31, 2005 and 2004, respectively, were used to determine benefit obligations.

A discount rate of 5.75 percent and 6.00 percent at December 31, 2005 and 2004,

| Name of Respondent | This Report is: | Date of Report | Year/Period of Report | | |
|-------------------------------------------|--------------------------|----------------|-----------------------|--|--|
| | (1) <u>X</u> An Original | (Mo, Da, Yr) | | | |
| MDU Resources Group, Inc. | (2) _ A Resubmission | 12/31/2005 | 2005/Q4 | | |
| NOTES TO FINANCIAL STATEMENTS (Continued) | | | | | |

respectively, and a rate of compensation increase of 4.75 percent at both December 31, 2005 and 2004, were used to determine net periodic benefit cost. The decrease in minimum liability included in other comprehensive income was \$1.1 million in 2005 and the increase in minimum liability in other comprehensive income was \$3.8 million in 2004.

The amount of benefit payments for the unfunded, nonqualified benefit plan, as appropriate, are expected to aggregate \$2.6 million in 2006; \$2.9 million in 2007; \$3.1 million in 2008; \$3.3 million in 2009; \$3.5 million in 2010; and \$21.4 million for the years 2011 through 2015.

The Company sponsors various defined contribution pension plans for eligible employees. Costs incurred by the Company under these plans were \$17.0 million in 2005, \$13.8 million in 2004 and \$9.8 million in 2003. The costs incurred in each year reflect additional participants as a result of business acquisitions.

NOTE 16 - JOINTLY OWNED FACILITIES

The consolidated financial statements include the Company's 22.7 percent and 25.0 percent ownership interests in the assets, liabilities and expenses of the Big Stone Station and the Coyote Station, respectively. Each owner of the Big Stone and Coyote stations is responsible for financing its investment in the jointly owned facilities.

The Company's share of the Big Stone Station and Coyote Station operating expenses was reflected in the appropriate categories of operating expenses in the Consolidated Statements of Income.

At December 31, the Company's share of the cost of utility plant in service and related accumulated depreciation for the stations was as follows:

| | 2005 | 2004 |
|------------------------------------------------------------------------------|---------------------|---------------------|
| Big Stone Station: | (In the | ousands) |
| Utility plant in service Less accumulated depreciation | \$ 56,305 38,011 | \$ 52,157 36,488 |
| | \$ 18,294 | \$ 15,669 |
| Coyote Station: Utility plant in service Less accumulated depreciation | \$125,007 76,563 | \$124,388 74,671 |
| | \$ 48,444 | \$ 49,717 |

NOTE 17 - REGULATORY MATTERS AND REVENUES SUBJECT TO REFUND
On September 30, 2005, Montana-Dakota filed an application with the MTPSC for a natural
gas rate increase. Montana-Dakota requested a total increase of \$1.1 million annually or
1.3 percent above current rates. On January 26, 2006, this application was withdrawn as a
result of Montana-Dakota's implementation of cost-reduction measures.

In September 2004, Great Plains filed an application with the MPUC for a natural gas rate increase. Great Plains had requested a total increase of \$1.4 million annually or approximately 4.0 percent above current rates. Great Plains also requested an interim increase of \$1.4 million annually. In November 2004, the MPUC issued an Order authorizing an interim increase of \$1.4 million annually effective with service rendered on or after January 10, 2005, subject to refund. A final order from the MPUC is expected in early 2006.

A liability has been provided for a portion of the revenues that have been collected subject to refund with respect to Great Plains' pending regulatory proceeding. Great Plains believes that the liability is adequate based on its assessment of the ultimate outcome of the proceeding.

| NOTES TO FINANCIAL STATEMENTS (Continued) | | | | | | |

In December 1999, Williston Basin filed a general natural gas rate change application with the FERC. Williston Basin began collecting such rates effective June 1, 2000, subject to refund. On April 19, 2005, the FERC issued its Order on Compliance Filing and Motion for Refunds. In this Order, the FERC approved Williston Basin's refund rates and established rates to be effective April 19, 2005. Williston Basin filed its compliance filing complying with the requirements of this Order regarding rates and issued refunds totaling approximately \$18.5 million to its customers on May 19, 2005. As a result of the Order, Williston Basin recorded a \$5.0 million (after tax) benefit from the resolution of the rate proceeding which included the reversal of a portion of the liability it had previously established for this regulatory proceeding. On June 16, 2005, Williston Basin appealed to the D.C. Appeals Court certain issues addressed by the FERC's Order on Initial Decision dated July 2003 and its Order on Rehearing dated May 2004 concerning determinations associated with cost of service and volumes used in allocating costs and designing rates. Those matters are pending resolution by the D.C. Appeals Court. A provision has been established for certain issues pending before the D.C. Appeals Court. The Company believes that the provision is adequate based on its assessment of the ultimate outcome of the proceeding.

In May 2004, the FERC remanded issues regarding certain service and annual demand quantity restrictions to an ALJ for resolution. Williston Basin participated in a hearing before the ALJ in early January 2005, regarding those service and annual demand quantity restrictions. On April 8, 2005, the ALJ issued an Initial Decision on the matters remanded by the FERC. In the Initial Decision, the ALJ decided that Williston Basin had not supported its position regarding the service and annual demand quantity restrictions. Williston Basin filed its Brief on Exceptions regarding these issues with the FERC on May 9, 2005, and its Brief Opposing Exceptions to issues raised by a certain party to the proceeding on May 31, 2005. On November 22, 2005, the FERC issued an Order on Initial Decision affirming the ALJ's Initial Decision regarding the service and annual demand quantity restrictions. On December 22, 2005, Williston Basin filed its Request for Rehearing of the FERC's Order on Initial Decision. This matter is awaiting resolution by the FERC.

NOTE 18 - COMMITMENTS AND CONTINGENCIES Litigation

Royalties Case In June 1997, Grynberg filed suit under the Federal False Claims Act against Williston Basin and Montana-Dakota. Grynberg also filed more than 70 similar suits against natural gas transmission companies and producers, gatherers and processors of natural gas. Grynberg, acting on behalf of the United States under the Federal False Claims Act, alleged improper measurement of the heating content and volume of natural gas purchased by the defendants resulting in the underpayment of royalties to the United States. All cases were consolidated in the Wyoming Federal District Court.

In June 2004, following preliminary discovery, Williston Basin and Montana-Dakota joined with other defendants and filed a Motion to Dismiss on the ground that the information upon which Grynberg based his complaint was publicly disclosed prior to the filing of his complaint and further, that he is not the original source of such information. The Motion to Dismiss was heard on March 17 and 18, 2005, by the Special Master appointed by the Wyoming Federal District Court. The Special Master, in his Written Report dated May 13, 2005, recommended that the lawsuit be dismissed against certain defendants, including Williston Basin and Montana-Dakota. A hearing on the adoption of the Written Report was held on December 9, 2005, before the Wyoming Federal District Court.

In the event the Motion to Dismiss is not granted, it is expected that further discovery will follow. Williston Basin and Montana-Dakota believe Grynberg will not prevail in the suit or recover damages from Williston Basin and/or Montana-Dakota because insufficient facts exist to support the allegations. Williston Basin and Montana-Dakota believe Grynberg's claims are without merit and intend to vigorously contest this suit.

Grynberg has not specified the amount he seeks to recover. Williston Basin and

FERC FORM NO. 1 (ED. 12-88)

| NOTES TO FINANCIAL STATEMENTS (Continued) | | | | | |

Montana-Dakota are unable to estimate their potential exposure and will be unable to do so until discovery is completed.

Coalbed Natural Gas Operations Fidelity has been named as a defendant in, and/or certain of its operations are or have been the subject of, more than a dozen lawsuits filed in connection with its coalbed natural gas development in the Powder River Basin in Montana and Wyoming. These lawsuits were filed in federal and state courts in Montana between June 2000 and November 2004 by a number of environmental organizations, including the NPRC and the Montana Environmental Information Center, as well as the Tongue River Water Users' Association and the Northern Cheyenne Tribe. Portions of two of the lawsuits have been transferred to the Wyoming Federal District Court. The lawsuits involve allegations that Fidelity and/or various government agencies are in violation of state and/or federal law, including the Clean Water Act, the NEPA, the Federal Land Management Policy Act, the NHPA and the Montana Environmental Policy Act. The cases involving alleged violations of the Clean Water Act have been resolved without a finding that Fidelity is in violation of the Clean Water Act. There presently are no claims pending for penalties, fines or damages under the Clean Water Act. The suits that remain extant include a variety of claims that state and federal government agencies violated various environmental laws that impose procedural requirements and the lawsuits seek injunctive relief, invalidation of various permits and unspecified damages.

In suits filed in the Montana Federal District Court, the NPRC and the Northern Cheyenne Tribe asserted that further development by Fidelity and others of coalbed natural gas in Montana should be enjoined until the BLM completes a SEIS. The Montana Federal District Court, in February 2005, entered a ruling requiring the BLM to complete a SEIS. The Montana Federal District Court later entered an order that would have allowed limited coalbed natural gas development in the Powder River Basin in Montana pending the BLM's preparation of the SEIS. The plaintiffs appealed the decision to the Ninth Circuit. The Montana Federal District Court declined to enter an injunction requested by the NPRC and the Northern Cheyenne Tribe that would have enjoined development pending the appeal. In late May 2005, the Ninth Circuit granted the request of the NPRC and the Northern Cheyenne Tribe and, pending further order from the Ninth Circuit, enjoined the BLM from approving any new coalbed natural gas development projects in the Powder River Basin in Montana. That court also enjoined Fidelity from drilling any additional federally permitted wells in its Montana Coal Creek Project and from constructing infrastructure to produce and transport coalbed natural gas from the Coal Creek Project's existing federal wells. The matter has been fully briefed and argued before the Ninth Circuit and the parties are awaiting a decision of the court.

In related actions in the Montana Federal District Court, the NPRC and the Northern Cheyenne Tribe asserted, among other things, that the actions of the BLM in approving Fidelity's applications for permits and the plan of development for the Badger Hills Project in Montana did not comply with applicable Federal laws, including the NHPA and the NEPA. The NPRC also asserted that the Environmental Assessment that supported the BLM's prior approval of the Badger Hills Project was invalid. On June 6, 2005, the Montana Federal District Court issued orders in these cases enjoining operations on Fidelity's Badger Hills Project pending the BLM's consultation with the Northern Cheyenne Tribe as to satisfaction of the applicable requirements of NHPA and a further environmental analysis under NEPA. Fidelity has sought and obtained stays of the injunctive relief from the Montana Federal District Court and production from Fidelity's Badger Hills Project continues. On September 2, 2005, the Montana Federal District Court entered an Order based on a stipulation between the parties to the NPRC action that production from existing wells in Fidelity's Badger Hills Project may continue pending preparation of a revised environmental analysis. On November 1, 2005, the Montana Federal District Court entered an Order based on a stipulation between the parties to the Northern Cheyenne Tribe action that production from existing wells in Fidelity's Badger Hills Project may continue pending preparation of a revised environmental analysis. On December 16, 2005, Fidelity filed a Notice of Appeal to the Ninth Circuit.

| Name of Respondent | This Report is: | Date of Report | Year/Period of Report | | |
|-------------------------------------------|--------------------------|----------------|-----------------------|--|--|
| | (1) <u>X</u> An Original | (Mo, Da, Yr) | · | | |
| MDU Resources Group, Inc. | (2) _ A Resubmission | 12/31/2005 | 2005/Q4 | | |
| NOTES TO FINANCIAL STATEMENTS (Continued) | | | | | |

The NPRC has filed a petition with the BER and the BER has initiated related rulemaking proceedings to create rules that would, if promulgated, require re-injection of water produced in connection with coalbed natural gas operations and treatment of such water in the event re-injection is not feasible and amend the nondegradation policy in connection with coalbed natural gas development. If the rules are adopted as proposed, it is possible that an adverse impact on Fidelity's operations could result. At this point, the Company cannot predict the outcome of the rulemaking process before the BER or its impact on the Company's operations.

Fidelity is vigorously defending its interests in all coalbed-related lawsuits and related actions in which it is involved, including the Ninth Circuit injunction. In those cases where damage claims have been asserted, Fidelity is unable to quantify the damages sought and will be unable to do so until after the completion of discovery. If the plaintiffs are successful in these lawsuits, the ultimate outcome of the actions could have a material effect on Fidelity's existing coalbed natural gas operations and/or the future development of this resource in the affected regions.

Electric Operations Montana-Dakota has joined with two electric generators in appealing a finding by the ND Health Department in September 2003 that the ND Health Department may unilaterally revise operating permits previously issued to electric generating plants. Although it is doubtful that any revision of Montana-Dakota's operating permits by the ND Health Department would reduce the amount of electricity its plants could generate, the finding, if allowed to stand, could increase costs for sulfur dioxide removal and/or limit Montana-Dakota's ability to modify or expand operations at its North Dakota generation sites. Montana-Dakota and the other electric generators filed their appeal of the order in October 2003 in the Burleigh County District Court in Bismarck, North Dakota. Proceedings have been stayed pending discussions with the EPA, the ND Health Department and the other electric generators. The Company cannot predict the outcome of the ND Health Department matter or its ultimate impact on its operations.

Natural Gas Storage Williston Basin filed suit on January 27, 2006, seeking to recover unspecified damages from Anadarko and its wholly owned subsidiary, Howell, and to enjoin Anadarko's and Howell's present and future operations in and near Williston Basin's Elk Basin Storage Reservoir located in Wyoming and Montana. Based on relevant information, including reservoir and well pressure data, it appears that reservoir pressure has decreased and that quantities of gas may have been diverted by Anadarko's and Howell's drilling and production activities in areas within and near the boundaries of Williston Basin's Elk Basin Storage Reservoir. Williston Basin is seeking not only to recover damages for the gas that has been diverted, but to prevent further drainage of its storage reservoir. Williston Basin is also assessing further avenues for recovery through the regulatory process at the FERC. Because of the very preliminary stage of the legal proceedings, Williston Basin cannot estimate the size of any potential loss or recovery, or the likelihood of obtaining injunctive relief or recovery through the regulatory process.

The Company is also involved in other legal actions in the ordinary course of its business. Although the outcomes of any such legal actions cannot be predicted, management believes that the outcomes with respect to these other legal proceedings will not have a material adverse effect upon the Company's financial position or results of operations.

Environmental matters

Portland Harbor Site In December 2000, MBI was named by the EPA as a Potentially Responsible Party in connection with the cleanup of a commercial property site, acquired by MBI in 1999, and part of the Portland, Oregon, Harbor Superfund Site. Sixty-eight other parties were also named in this administrative action. The EPA wants responsible parties to share in the cleanup of sediment contamination in the Willamette River. To date, costs of the overall remedial investigation of the harbor site for both the EPA and the DEQ are being recorded and initially paid, through an administrative consent order, by the LWG, a group of 10 entities which does not include MBI. The LWG estimates the overall remedial

| Name of Respondent | This Report is: | Date of Report | Year/Period of Report | | |
|-------------------------------------------|--------------------------|----------------|-----------------------|--|--|
| | (1) <u>X</u> An Original | (Mo, Da, Yr) | · | | |
| MDU Resources Group, Inc. | (2) _ A Resubmission | 12/31/2005 | 2005/Q4 | | |
| NOTES TO FINANCIAL STATEMENTS (Continued) | | | | | |

investigation and feasibility study will cost approximately \$10 million. It is not possible to estimate the cost of a corrective action plan until the remedial investigation and feasibility study has been completed, the EPA has decided on a strategy, and a record of decision has been published. While the remedial investigation and feasibility study for the harbor site has commenced, it is expected to take several years to complete. The development of a proposed plan and record of decision on the harbor site is not anticipated to occur until later in 2006, after which a cleanup plan will be undertaken.

Based upon a review of the Portland Harbor sediment contamination evaluation by the DEQ and other information available, MBI does not believe it is a Responsible Party. In addition, MBI has notified Georgia-Pacific West, Inc., the seller of the commercial property site to MBI, that it intends to seek indemnity for any and all liabilities incurred in relation to the above matters, pursuant to the terms of the sale agreement under which MBI acquired the property.

The Company believes it is not probable that it will incur any material environmental remediation costs or damages in relation to the above administrative action.

Operating leases

The Company leases certain equipment, facilities and land under operating lease agreements. The amounts of annual minimum lease payments due under these leases as of December 31, 2005, were \$13.2 million in 2006, \$8.6 million in 2007, \$6.5 million in 2008, \$4.2 million in 2009, \$2.8 million in 2010 and \$24.1 million thereafter. Rent expense was \$34.0 million, \$30.6 million and \$27.2 million for the years ended December 31, 2005, 2004 and 2003, respectively.

Purchase commitments

The Company has entered into various commitments, largely natural gas and coal supply, purchased power, natural gas transportation, construction materials supply and electric generation construction contracts. These commitments range from one to 21 years. The commitments under these contracts as of December 31, 2005, were \$303.6 million in 2006, \$131.3 million in 2007, \$79.5 million in 2008, \$63.5 million in 2009, \$62.7 million in 2010 and \$294.4 million thereafter. Amounts purchased under various commitments for the years ended December 31, 2005, 2004 and 2003, were approximately \$443.9 million, \$318.3 million and \$204.6 million, respectively. These commitments are not reflected in the Company's consolidated financial statements.

In addition to the above obligations, the Company has certain purchase obligations for natural gas connected to its gathering system. These purchases and the resale of the natural gas are at market-based prices. These obligations continue as long as natural gas is produced. However, if the purchase and resale of natural gas become uneconomical, the purchase commitments can be canceled by the Company with 60 days notice. These purchase obligations are estimated at approximately \$10 million annually.

Guarantees

In connection with the sale of MPX in June 2005 to Petrobras, an indirect wholly owned subsidiary of the Company has agreed to indemnify Petrobras for 49 percent of any losses that Petrobras may incur from certain contingent liabilities specified in the purchase agreement. Centennial has agreed to unconditionally guarantee payment of the indemnity obligations to Petrobras for periods ranging from approximately two to five and a half years from the date of sale. The guarantee was required by Petrobras as a condition to closing the sale of MPX.

In addition, WBI Holdings has guaranteed certain of Fidelity's natural gas and oil price swap and collar agreement obligations. Fidelity's obligations at December 31, 2005, were \$16.3 million. There is no fixed maximum amount guaranteed in relation to the natural gas and oil price swap and collar agreements, as the amount of the obligation is dependent upon natural gas and oil commodity prices. The amount of hedging activity entered into by the subsidiary is limited by corporate policy. The guarantees of the natural gas and oil

| Name of Respondent | This Report is: | Date of Report | Year/Period of Report | | |
|-------------------------------------------|----------------------|----------------|-----------------------|--|--|
| | (1) X An Original | (Mo, Da, Yr) | · | | |
| MDU Resources Group, Inc. | (2) _ A Resubmission | 12/31/2005 | 2005/Q4 | | |
| NOTES TO FINANCIAL STATEMENTS (Continued) | | | | | |

price swap and collar agreements at December 31, 2005, expire in 2006; however, Fidelity continues to enter into additional hedging activities and, as a result, WBI Holdings from time to time may issue additional guarantees on these hedging obligations. The amount outstanding by Fidelity was reflected on the Consolidated Balance Sheets at December 31, 2005. In the event Fidelity defaults under its obligations, WBI Holdings would be required to make payments under its guarantees.

Certain subsidiaries of the Company have outstanding guarantees to third parties that guarantee the performance of other subsidiaries of the Company. These guarantees are related to natural gas transportation and sales agreements, electric power supply agreements and certain other guarantees. At December 31, 2005, the fixed maximum amounts guaranteed under these agreements aggregated \$73.6 million. The amounts of scheduled expiration of the maximum amounts guaranteed under these agreements aggregate \$8.5 million in 2006; \$10.3 million in 2007; \$400,000 in 2008; \$900,000 in 2009; \$30.0 million in 2010; \$12.0 million in 2012; \$2.0 million in 2028; \$500,000, which is subject to expiration 30 days after the receipt of written notice; and \$9.0 million, which has no scheduled maturity date. A guarantee for an unfixed amount estimated at \$250,000 at December 31, 2005, has no scheduled maturity date. The amount outstanding by subsidiaries of the Company under the above guarantees was \$532,000 and was reflected on the Consolidated Balance Sheets at December 31, 2005. In the event of default under these guarantee obligations, the subsidiary issuing the guarantee for that particular obligation would be required to make payments under its guarantee.

Centennial has outstanding letters of credit to third parties related to insurance policies and other agreements that guarantee the performance of other subsidiaries of the Company. At December 31, 2005, the fixed maximum amounts guaranteed under these letters of credit aggregated \$32.3 million. The letters of credit are scheduled to expire in 2006. There were no amounts outstanding under the above letters of credit at December 31, 2005.

Fidelity and WBI Holdings have outstanding guarantees to Williston Basin. These guarantees are related to natural gas transportation and storage agreements that guarantee the performance of Prairielands. At December 31, 2005, the fixed maximum amounts guaranteed under these agreements aggregated \$22.9 million. Scheduled expiration of the maximum amounts guaranteed under these agreements aggregate \$2.9 million in 2008 and \$20.0 million in 2009. In the event of Prairielands' default in its payment obligations, the subsidiary issuing the guarantee for that particular obligation would be required to make payments under its guarantee. The amount outstanding by Prairielands under the above guarantees was \$1.7 million, which was not reflected on the Consolidated Balance Sheets at December 31, 2005, because these intercompany transactions are eliminated in consolidation.

In addition, Centennial has issued guarantees to third parties related to the Company's routine purchase of maintenance items and lease obligations for which no fixed maximum amounts have been specified. These guarantees have no scheduled maturity date. In the event a subsidiary of the Company defaults under its obligation in relation to the purchase of certain maintenance items or lease obligations, Centennial would be required to make payments under these guarantees. Any amounts outstanding by subsidiaries of the Company for these maintenance items and lease obligations were reflected on the Consolidated Balance Sheets at December 31, 2005.

As of December 31, 2005, Centennial was contingently liable for the performance of certain of its subsidiaries under approximately \$454 million of surety bonds. These bonds are principally for construction contracts and reclamation obligations of these subsidiaries entered into in the normal course of business. Centennial indemnifies the respective surety bond companies against any exposure under the bonds. The purpose of Centennial's indemnification is to allow the subsidiaries to obtain bonding at competitive rates. In the event a subsidiary of the Company does not fulfill its obligations in relation to its bonded contract or obligation, Centennial may be required to make payments under its indemnification. A large portion of these contingent commitments is expected to expire within the next 12 months; however, Centennial will likely continue to enter into surety

| NOTES TO FINANCIAL STATEMENTS (Continued) | | | | | | |

bonds for its subsidiaries in the future. The surety bonds were not reflected on the Consolidated Balance Sheets.

NOTE 19 - RELATED PARTY TRANSACTIONS
In 2004, Bitter Creek entered into two natural gas gathering agreements with Nance
Petroleum. Robert L. Nance, an executive officer and shareholder of St. Mary, also is a
member of the Board of Directors of the Company. The natural gas gathering agreements with
Nance Petroleum were effective upon completion of certain high and low pressure gathering
facilities, which occurred in mid-December 2004. Bitter Creek's capital expenditures
related to the completion of the gathering lines and the expansion of its gathering
facilities to accommodate the natural gas gathering agreements were \$2.5 million and \$7.6
million in 2005 and 2004, respectively, and are estimated for the next three years to be
\$2.2 million in 2006, \$3.3 million in 2007 and \$500,000 in 2008. The natural gas gathering
agreements are each for a term of 15 years and month-to-month thereafter. Bitter Creek's
revenues from these contracts were \$1.2 million and \$37,000 in 2005 and 2004,
respectively, and estimated revenues from these contracts for the next three years are
\$2.8 million in 2006, \$3.5 million in 2007 and \$5.4 million in 2008. The amount due from
Nance Petroleum at December 31, 2005, was \$118,000.

In 2005, Montana-Dakota entered into agreements to purchase natural gas from Nance Petroleum through March 31, 2006. Montana-Dakota's expenses under these agreements were \$4.2 million in 2005. Montana-Dakota estimates that it will purchase approximately \$2.2 million of natural gas from Nance Petroleum in 2006. The amount due to Nance Petroleum at December 31, 2005, was \$686,000.

In 2005, Fidelity entered into an agreement for the purchase of an ownership interest in a natural gas and oil property with a third party whereunder it became a party to a joint operating agreement in which St. Mary is the operator of the property. St. Mary receives an overhead fee as operator of this property. The Company recorded its proportionate share of capital costs allocable to its ownership interest in the related property, which were not material to Fidelity.

NOTE 20

Investment in Subsidiaries

The Respondent owns one wholly owned subsidiary, Centennial Energy Holdings, Inc.

The financial statements were prepared in accordance with the accounting requirements of the Federal Energy Regulatory Commission as set forth in its applicable Uniform System of Accounts and published accounting releases, which is a comprehensive basis of accounting other than accounting principles generally accepted in the United States of America. required by the Federal Energy Regulatory Commission for Form 1 report purposes, MDU Resources Group, Inc. reports its subsidiary investment using the equity method rather than consolidating the assets, liabilities, revenues and expenses of the subsidiary, as required by generally accepted accounting principles. If generally accepted accounting principles were followed, utility plant, other property and investments would increase by \$1,042,573,034; current and accrued assets would increase by \$757,217,104; deferred debits would increase by \$276,891,174; long-term debt would increase by \$918,779,542; other noncurrent liabilities and current and accrued liabilities would increase by \$473,258,965; deferred credits would increase by \$684,642,805 as of December 31, 2005. Furthermore, operating revenues would increase by \$2,889,976,026 and operating expenses, excluding income taxes, would increase by \$2,478,392,222 for the twelve months ended December 31, 2005. In addition, net cash provided by operating activities would increase by \$427,072,000; net cash used in investing activities would increase by \$634,630,000; net cash used in financing activities would decrease by \$208,828,000; and the net change in cash and cash equivalents would be an increase of \$1,270,000 for the twelve months ended December 31, 2005. Reporting its subsidiary investment using the equity method rather than generally accepted accounting principles has no effect on net income or retained earnings.

Montana-Dakota's annual peak occurred during HE1700 July 13, 2005. All generation units were available for operation during the peak hour. The following units were on line and providing energy.

| Heskett #1 | 16.8 |
|------------------|-------|
| Heskett #2 | 69.2 |
| Lewis & Clark | 39.4 |
| Glendive Turbine | 21.1 |
| Coyote | 100.0 |
| Big Stone | 101.0 |

In addition to the above units, Montana-Dakota was purchasing 67 MW of its 67 MW share of the Antelope Valley Unit 2. Montana-Dakota also purchased 26.0 MW from MISO to meet the peak demand.
